ANNUAL REPORT

OF THE

BOARD OF TRUSTEES

OF THE

Georgia State Sanitarium,

For the Eight Months Ending May 1st, 1903.

MILLEDGEVILLE, GA., May 28th, 1903.

To His Excellency, Joseph M. Terrell, Governor:

SIR:—In obedience to statutory requirement the Trustees of the Georgia State Sanitarium respectfully submit herewith their report of its conduct and management for the eight months ending May 1st, 1903.

Attached hereto and forming a part of this report will be found the reports of the Superintendent and other officers of the Sanitarium, to which you are referred for details as to its management.

Through Committees appointed for such purpose we have visited the Sanitarium once each month, and have regularly and thoroughly examined into all its affairs, each time finding them in perfect order.

The Board of Trustees meets regularly once each quarter and at such other times as necessity may demand to review the acts of its committees, and to transact such other business as may come before it.

COST OF MAINTENANCE.

We closed the fiscal year ending September 1st, 1902, with a balance in the hands of our Treasurer of.	\$ 5,525 31
We have drawn from the State Treasurer in eight months on account of maintenance.....	\$ 204,999 96
Making a total of.....	\$210,525 27
From which is to be deducted the balance now on hand of	8,402 40
Making the cost of maintenance for eight months..	\$202,122 87

With this sum we have properly cared for an average of 2,696 patients, for eight months, providing them with food, clothing, heat, lights, laundry, medical attention, medicines, nurses, bedding etc. In addition to this we have kept the State's property, i. e. the Sanitarium buildings, representing an investment of upwards of \$1,500,000, in good repair, have made several permanent improvements to the property as shall appear later on, and have paid the Superintendent's salary since January 1st, last, an expense hitherto for many years, paid directly by the State Treasurer from a special appropriation for that purpose. All of which has been done at a cost to the State per patient of $30\frac{95}{100}$ cents per day, or \$112.97 per year. That this result has been accomplished in the face of the prevailing high prices for supplies is the most conclusive evidence we can offer you as to the economical management of this institution. The eight months for which this report is made are usually accounted the hardest or most expensive months in the year, the summer months by reason of the supply of produce from the gardens and farm being accounted the cheapest. Had this report been made for the full year, and at the usual time, the cost per patient for the current year would have been less than last year, which was $30\frac{87}{100}$ cents per day for each patient, against $30\frac{95}{100}$ this year. It is interesting to note that no other institution of similar kind in the United States, so far as we know, has yet equalled this splendid record. We have endeavored to operate the Sanitarium as economically as possible, but we have been ever impressed, and are now, that the first and greatest care of the State should and ought to be the welfare of the patients, and in this connection we recognize there is a danger line in our efforts towards even greater economy.

HOW SUPPLIES ARE BOUGHT.

All supplies for the institution are bought under competitive bids, bidders being required to submit samples of the articles proposed to be furnished, with their bids. Purchases are thus made, once each quarter by four of our members known as the Prudential Committee, assisted by the Superintendent and Steward. In every instance contracts are awarded as may appear for the best interests of the State. In this way, we were enabled to contract for our year's supply of coal, i. e., 10,000 tons, in the face of an advanced market, at an increase of but 8 cents per ton over the cost last year. Mention is here made of the contract made for supplying the institution with beef for the current year. Samples and bids were before us ranging from \$5.18 to \$5.72 per hundred pounds. We awarded the contract at the last named price, and in so doing are aware that we laid ourselves open to the charge of extravagance by the uninformed.

As a matter of fact, however, owing to the superior quality of the beef bought, it being fat, juicy, well cured, thoroughly dripped and containing far less bone to the given number of pounds than the cheaper beef, we estimate that by reason of the smaller quantity of it required to supply our needs that this contract will approximate a net saving to the State of more than \$1,800.00 for the year.

SANITATION AND WELFARE OF PATIENTS.

Your attention is earnestly directed to the urgent necessity of providing us with means for accomplishing the complete isolation of patients afflicted with tuberculosis. Particularly is this called for by the distressing condition existing among our negro patients, who are peculiarly subject to this dread disease. Of the deaths occurring among our patients during the eight months covered by this report 30 $\frac{5}{6}$ per cent. of them can be attributed to this cause, and this percentage is steadily increasing. Modern science has demonstrated the extremely infectious nature of this disease, and the necessity for completely isolating patients of this class if a spread of it would be avoided. This we cannot accomplish in our present buildings. The isolation would be imperfect. It is extremely desirable that four small frame buildings entirely separate and apart from the other buildings be erected, providing in this manner for the accommodation of tubercular cases from both sexes of both races. Such buildings could be erected at a cost not exceeding \$2,500 each, and

this work should be done at once. Our appropriation is not large enough to permit us to make such an expenditure, and other provision must be made for it.

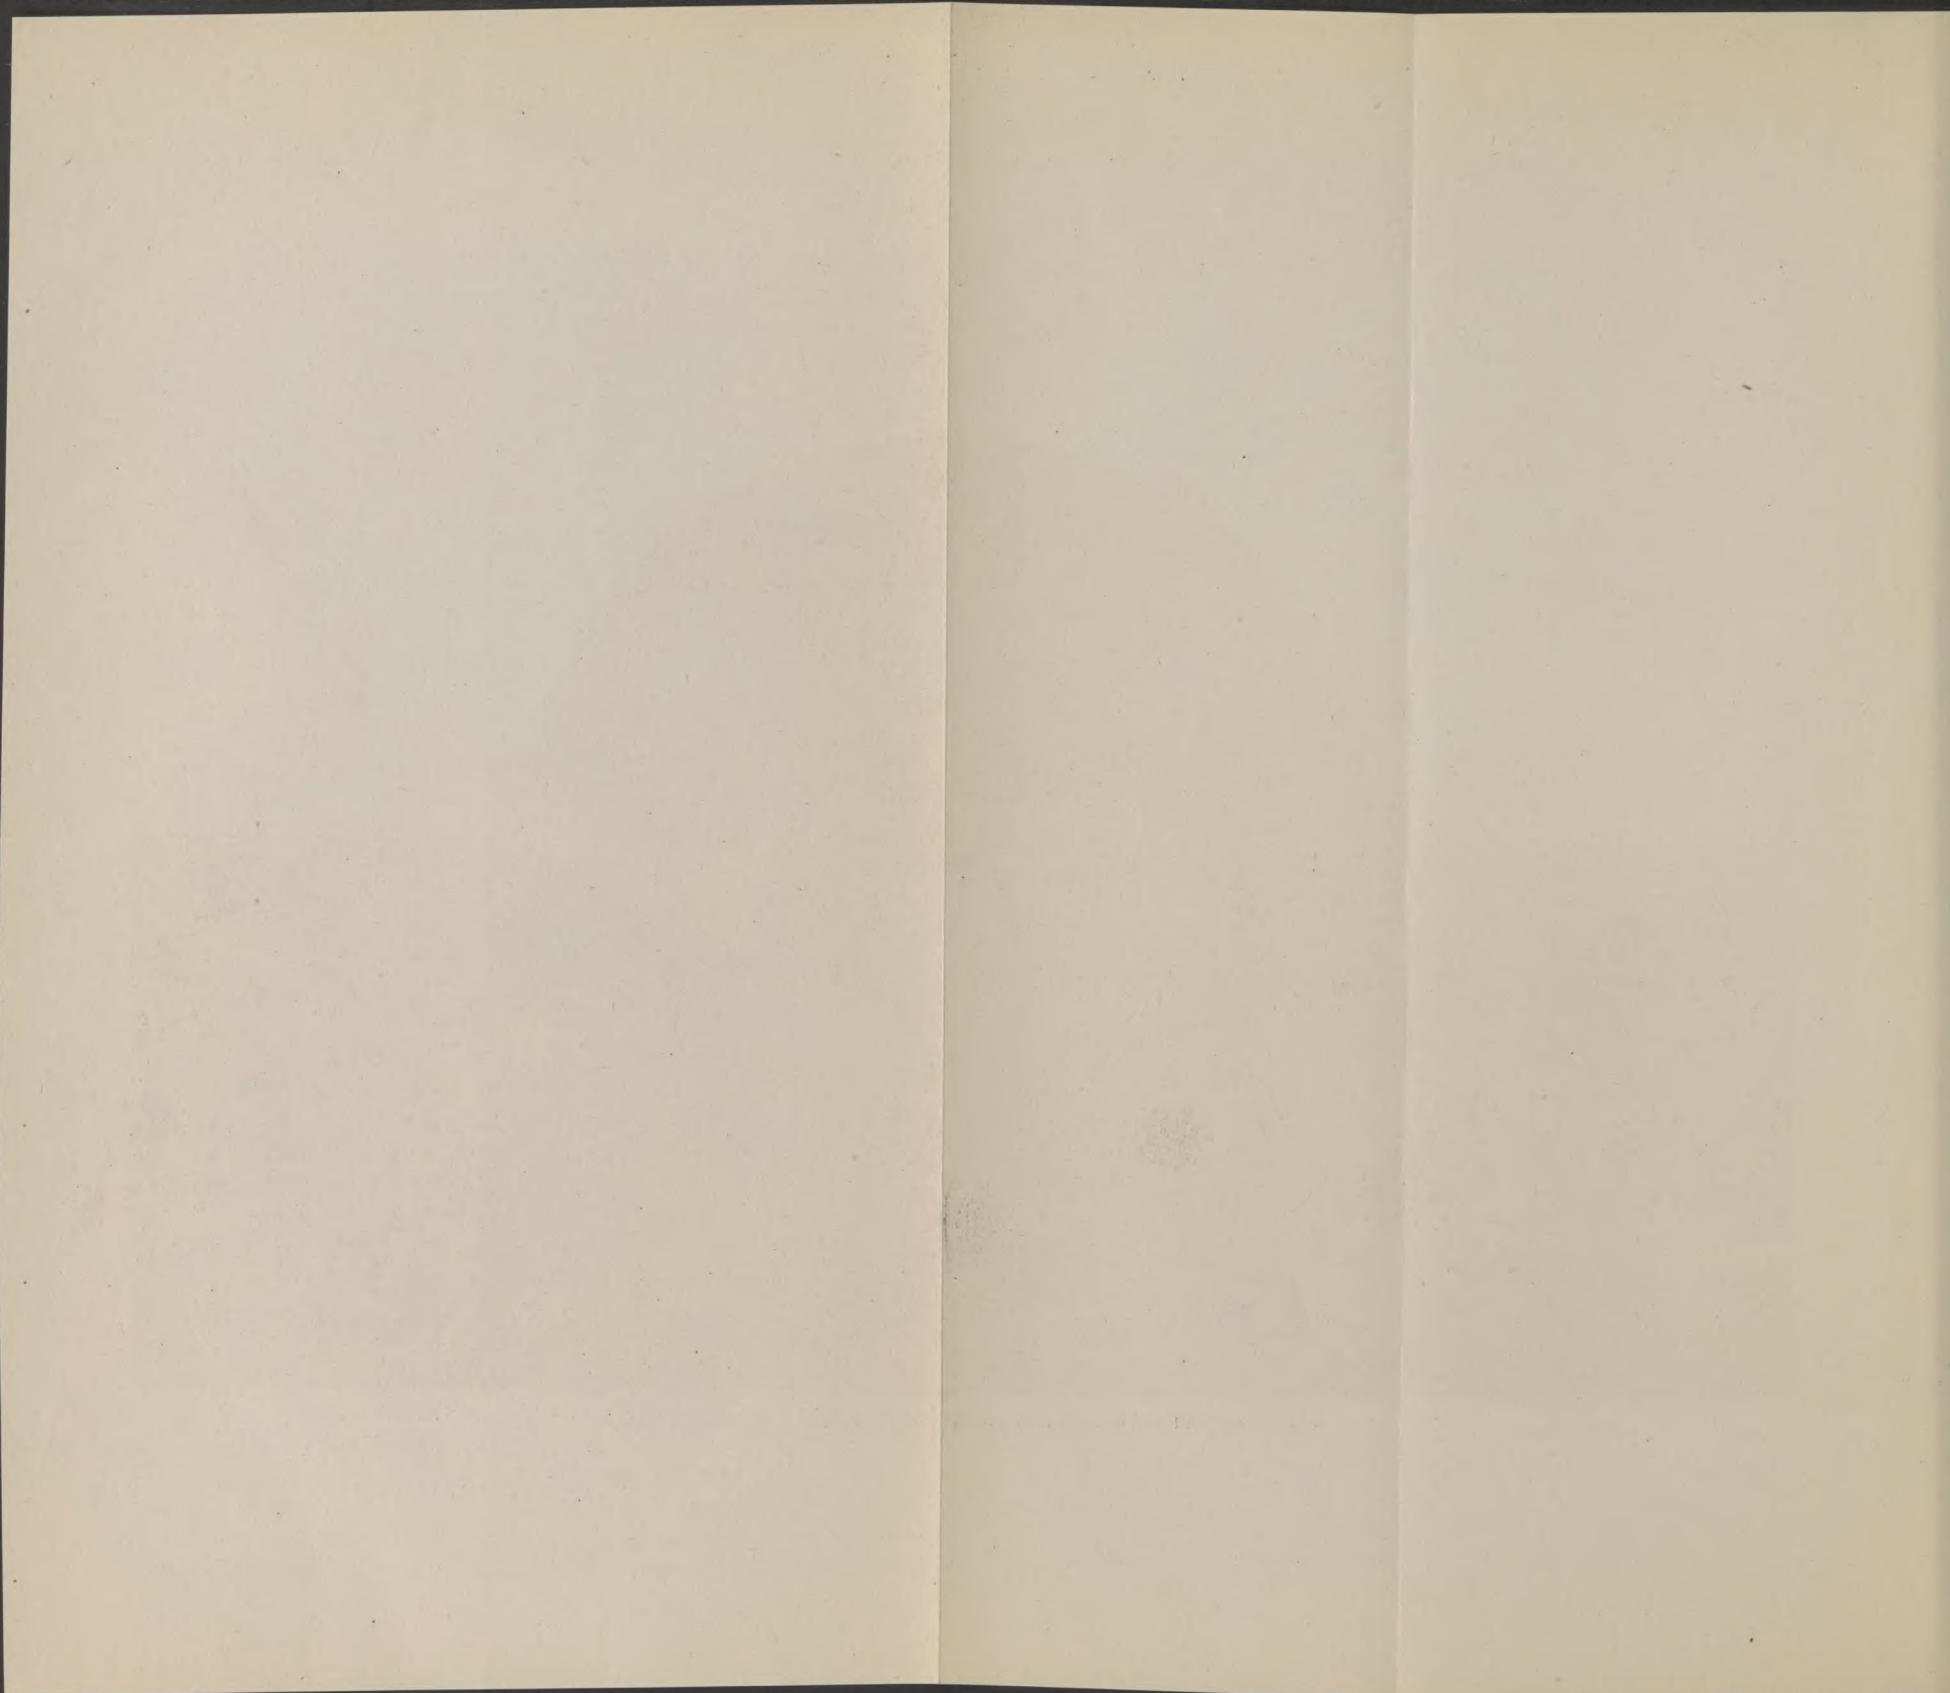

One case of smallpox has been brought into the institution since our last report, but the prompt preventative steps taken by the Superintendent prevented any spread of the disease.

NUMBER OF PATIENTS AND THE AMOUNT NEEDED FOR THEIR SUPPORT.

Our last report, dated September 1st, 1902, showed 2,675 patients on hand with 390 applicants awaiting admission. To-day we have 2,716 patients on hand with 437 applicants awaiting admission. We have received during the year 462 patients, and have discharged or lost by death and elopement 421, leaving 41 more patients on hand than at the close of last year. Notwithstanding the large number received during the year there are 47 more applications on file now than last year. In our last report we asked for appropriations of \$340,000 for 1903 and \$360,000 for 1904, setting forth in such request the necessity in our judgment for these amounts. We appeared in a body before the appropriation committees of both branches of the Legislature to urge with all the earnestness in our power that the needs of this noble charity be fully met. An appropriation of \$325,000 was given us for each of the years named, out of which should come the salary of the Superintendent and the salaries and expenses of the trustees, hitherto, for many years, provided for in another appropriation, representing a net increase over the amounts appropriated for the two years previous of \$30,000 per year. This amount, at the present cost per patient, will enable us to care for 265 additional patients, or about 50 per cent. of those now awaiting admission. To enable us to receive all of these applicants will require a still further increase of \$30,000 in the amounts appropriated to us. As soon as provision can be made for lighting and furnishing the new buildings they will be ready for occupancy. Three of the eight wings of these buildings are left unfinished interiorly, but the five finished wings provide accommodations for 1,120 patients. The overcrowded condition of the old buildings will make it necessary to transfer approximately 800 of the patients already here to the new buildings. This will leave accommodations for 320 new patients, and by finishing up the three wings above referred to 288 more can be accommodated. We lay these facts before you for your careful consideration and such action as you deem wise.

ONE OF TWIN BUILDINGS NOW IN PROCESS OF ERECTION.

EMPLOYMENTS, AMUSEMENTS, ETC.

The great bulk of the insane in any public hospital are not sick in the sense that they are incapacitated for physical labor. The majority are chronic cases, men and women in average health, whose happiness and welfare may be best provided for by making them useful and conscious of their usefulness. To this end, under proper limitations, such of our patients as are able, are encouraged to work on the farms, in the gardens, in the laundry, sewing room, work shop, and elsewhere, but no patient is forced to work against his will. That this policy is a benificent one is shown in the fact that a large per cent of our recoveries are from patients so employed.

As fully as our means will permit the day rooms are supplied with games, etc. Once each week a dance is given the patients in the amusement hall which is always a source of great pleasure to them. Religious services are conducted by the Chaplain twice a week. It is a source of keen regret to us that we have not sufficient funds with which to provide our unfortunate charges with musical and such other entertainments as are suited to them. Such wholesome pleasures, furnishing a most enjoyable diversion for them, constitute a valuable factor in the treatment of the insane, and provision should be regularly made for this purpose.

CONVICT AND CRIMINAL INSANE.

Your attention is directed to that portion of the Superintendent's report relating to the convict and criminal insane, in all of which we most heartily concur. It is extremely repugnant to all of the dictates of humanity to force the innocent insane in our care to associate with the convict and criminal insane, and we earnestly hope a way may be found for the discontinuance of this association.

FARM COLONY, PERMANENT IMPROVEMENTS, ETC.

We have proceeded with the development of the farm colony, which in time is destined to be of valuable assistance to us in the reduction of the expenses of the institution, and since our last report, have erected thereon three frame buildings with accommodations for 40 patients each. The increase in the number of patients located there made it necessary that a water supply should be provided. This we are doing by the erection of a dam across a nearby stream on the State's land, using the voluntary labor of negro patients in its construction, the installation of two hydraulic rams to raise the water, the laying of water mains to the colony,

and the erection there of a steel tower and tank. The material for this work has been bought and paid for, and the work will soon be completed.

The engine in the woodshop after fifty years continuous service has been replaced by a new one.

A roadway has been graded between the new buildings and the old necessitating the removal of 8,250 cubic yards of earth.

A cottage has been begun for the use of the officers of the institution adjacent to the new buildings.

SPECIAL APPROPRIATION, 1900.

The sum of \$150,000 was appropriated by the Legislature in 1900 for the erection of a suitable building or buildings to relieve the overcrowded condition of the other buildings and to provide additional accommodations for the constantly increasing number of insane. A twin building was determined upon, each structure consisting of a central octagon four stories high with four wings three stories high radiating therefrom. There is placed between the two buildings, a kitchen with boiler room attached and two congregate dining halls. These buildings have been accepted from the contractor, and as soon as provision is made for lighting and furnishing them they will be ready for occupancy. Five of the eight wings are completed entirely and partially furnished, while three are finished exteriorly only. Of the \$150,000 appropriated there remains in our Treasurer's hands a balance \$4,796.64.

Outstanding obligations, including the balance due to the contractor will, when paid, reduce this amount to about \$25.00. With all the wings completed these buildings will accommodate about 1,400 patients, and they stand to-day as the most remarkable buildings of their kind in the United States in the number of patients provided for within the limits of the appropriation. Before these buildings can be utilized, however, provision must be made for lighting and furnishing them. In addition it is necessary to erect certain brick walls about the buildings to insure privacy to the patients, and to provide them with recreation yards. To light the buildings with acetelyne gas we estimate it will cost the State approximately \$1,200.00 for a plant of sufficient capacity. To enlarge the present coal gas plant and lay mains from it to the new building will cost approximately \$4,700.00. To complete the furnishing of the five finished wings will cost \$7,200.00. To lay the brick (we have 400,000 brick now on hand and paid for to be used for this purpose) for the erection of the brick walls will cost

\$1,600.00. The whole, if we use acetelyne gas, will require approximately \$10,000.00. It is urgently necessary that prompt action should be taken in this matter.

DEATH OF DR. EUGENE FOSTER.

January 23rd, 1903.

We desire to place on record our appreciation of the valuable services rendered the State by Dr. Eugene Foster, of Augusta, now deceased, who for 14 years was a Trustee of this institution, and for four years President of the Board. While Dr. Foster was with us, he was our leader; he was always at the front. We were absolutely assured that nothing relating to the Sanitarium or to the comfort of its inmates would be overlooked or neglected. We had but to lean on him and follow in his footsteps. He discharged every obligation connected with his office, or relating to our work, with marked intelligence, untiring energy and zeal—impartially, fearlessly and without favor to anyone. He did not look for praise nor did he shun censure. Duty only was his watchword. He loved his friends, but he was not unduly swayed by them. He feared no foe. With an eye single to his obligations to a helpless and dependent people, and to the State, he labored day and night, in sunshine and in storm, for their relief and for the good of the institution, until God laid his hand upon him and took him from his work. Shortly before his death while confined to his room, unable to join us in our approaching meeting, well knowing that his end was near, and for the first time when the Sanitarium was mentioned, without making the slightest reference to its business affairs, he said to our Superintendent, who was then making his last visit to him at his home in Augusta: "Give my love to the Board." This was his farewell to us. In reply we wired him a tender message of sympathy and love, and we are thankful that it reached him in time to comfort him before he died. The same day we sent him a personal letter signed by each member of the Board with his own hand, but it was too late. Before the letter reached Augusta he had passed out of the cloud into the sunlight, and rested as those only rest whose labors here have been well done. In our hearts we can all say for him:

"God willed: I was. What he planned, I wrought:
That done, he called, and now I dwell with Him."

IN CONCLUSION.

In concluding this report we feel it would be indeed incomplete did we fail to record our appreciation of the extraordinarily faithful, devoted and efficient services rendered to the State by Superintendent Dr. T. O. Powell, and his able corps of assistants. The splendid service rendered by Dr. Powell to the State and to suffering humanity has endeared him to the hearts of all who know him. His unfailing courtesy, his lofty conceptions of right and wrong, his lifelong tireless devotion to his work, his modest unassuming demeanor, and his signal ability mark him as a man among men. As the directing genius of this great institution which is noted far and wide as a model of its kind, he has performed and is still performing a service for the State and for humanity that richly merits our highest praise and appreciation.

Respectfully submitted,

JOEL BRANHAM, President,

Report of Superintendent.

For the Eight Months Beginning September 1st, 1902, and
Ending May 1st, 1903.

GEORGIA STATE SANITARIUM, May 1st, 1903.

To the Honorable Board of Trustees, Georgia State Sanitarium:

GENTLEMEN:—In obedience to the requirements of the law and rules of this institution, I herewith submit for your consideration my report, and those of the Steward, Treasurer and other officers for the term beginning September 1st, 1902, and ending May 1st, 1903. This report covers only eight months to conform to the change in the time of the meeting of the General Assembly.

On September 1st, 1902, there were white patients on hand, 1,877, and colored, 798. There have been received since 293 whites and 169 colored, making a total reception of 462.

There have been discharged, removed, eloped and died 420, leaving on hand May 1st, 1903, 2,716, of whom there are 72 whites and 14 colored on furlough, not discharged.

The average number of patients under treatment during the year was 2,696 while the total number receiving treatment was 3,137.

It will be seen that the average number receiving treatment was 61 more than last year. We have 41 more patients on hand than at the close of last year.

We now have on file 437 applications of patients awaiting admission.

The following tables will give in detail the movement of the white and colored population.

STATEMENT—WHITE.

In relation to the number of white patients during the past eight months, or from September 1st, 1902, to May 1st, 1903.

TRIBUTE TO THE MEMORY OF DR. EUGENE FOSTER.

While I fully appreciate my inability to say anything that would do justice to the life and character of our beloved Dr. Eugene Foster, I cannot, however, pass unnoticed his death. He was a Trustee of this institution for 14 years, and President of the Board at the time of his death. He was born in Augusta, Ga., April 7th, 1850. In the midst of an active, important and useful life he passed from us on the 23rd of January, 1903. But the love and appreciation of his noble, true and manly life will never, never be forgotten. He was honest in his loyalty and friendship; honest and true in his convictions; ready to assert them on all occasions, and ready to defend them at all times. I thank God that it was my privilege to have known him so long and so well. I loved him, yes, I loved him, for his sterling worth and inflexible integrity of purpose. He was a true and loyal friend of the insane; indeed to all suffering humanity; a strong, bold advocate of everything that would advance the interests of this institution and add to the comfort and welfare of the patients. Dr. Foster did what he conceived to be his duty at all times, in all places, and under all circumstances regardless of results. He never considered for a moment the popular course to pursue on any question. His principle aim was to ascertain the right, and then pursue it with all of his great mental and physical powers. He had a contempt for any course pursued for the sake of policy to the neglect of the right. He was at all times unsparing in his denunciation of wrong wherever he found it.

In the beautiful tribute paid to his memory by the Trustees of St. James Church, of Augusta, Ga., of which he was a member,

they say of him, "The great aim of his life was devotion to duty; the betterment of public institutions; the love and elevation of mankind."

Dr. Foster had a big heart, brimful of love, charity and good will toward all suffering humanity. He had no contracted ideas. He was broad-minded, liberal, always ready to help a worthy cause. Very few people knew of his great liberality save those upon whom it was bestowed, and frequently they did not know from whom their aid came. He was an indomitable worker, and held many responsible positions. He was faithful and true to all. He always gave his valuable services freely and unselfishly in the discharge of all public duties imposed upon him. In his death the medical profession and the State lost a true and good man; this institution a good and true friend and wise counsellor. His advice was freely given, and of great value because of his ability and the honesty with which it was given. He has left many enduring monuments about this institution which exemplify his love and fidelity to his sacred trust as Trustee. God bless his memory and perpetuate his noble, manly and useful life for the good of others.

EMPLOYMENT AND AMUSEMENTS.

A large number of male patients have been employed in the garden, dairies, grading—indeed, in every department of the institution under the supervision of the nurses. The female patients have been employed in the laundry, wards, sewing rooms, etc. None, however, are forced to engage in any employment, but are encouraged to do so for their mental and physical improvement. You can readily see that these various departments provide healthy exercise for a large number which is absolutely necessary for the well being of many. For this reason the value of the above departments cannot be over-estimated as an indispensable adjunct to a hospital for the insane.

The musical feature on some of the wards, which has been very much improved in the past two years, is a valuable auxiliary to contentment and happiness.

Outdoor exercise is given to all whose condition will justify it when the weather will admit of it.

Dr. J. M. Whitaker, First Assistant Physician, takes the same interest in the weekly entertainments and amusements as formerly. These have been given regularly every week when the weather was suitable except during the time we were quarantined on account of smallpox, and all gatherings were stopped until all danger of the spread of the disease had passed.

PATHOLOGICAL DEPARTMENT.

The Pathologist, Dr. Perry, has given all the time he could to this important department, after discharging other duties imposed upon him. His report will give a full account of the work done in that department from September 1st, 1902, to May 1st, 1903, and it shows that of the leading or general diseases of those cases on which post-mortem investigation was made, endarteritis ranks first, chronic nephritis second, heart disease third, and consumption fourth, the latter being about 30.5 per cent.

RECOVERIES.

The per cent. of recoveries in hospitals for the insane is based upon the receptions during the year. We have received from September 1st, 1902, to May 1st, 1903, 462 patients. More than one half of them were chronic and probably incurable cases. The per cent. of recoveries for the past eight months is $44\frac{8}{10}$, which is very

gratifying when we remember that many of the cases received during the past eight months were cases of terminal dementia, general paresis, epilepsy and senile dementia, and some idiots. Such cases are hopeless, and simply add each year to the large population of chronic cases, that increase the list that has been accumulating for the past 40 or 50 years. It has been the policy of this institution for many years to extend furloughs or parole those that are able to maintain self-control, and we have now on parole at home 72 whites and 14 colored. They are liable to be brought back at any time.

OVERCROWDED.

Your honorable body is fully aware that for the past eighteen months or two years we have been overcrowded in every department of the institution, and that we have been under the necessity of receiving patients only as vacancies might occur, and to give preference to the most urgent cases. Many day rooms and sitting rooms have been converted into dormitories, and quite a large number of patients placed in them, and in the female colored department there are now 49 that sleep on the ward. Such a condition is to be regretted for it is not safe, nor is it conducive to physical health or mental improvement. We have endeavored in every way to keep the jails free from all insane. I regard it as a great misfortune that any one on account of their affliction should have to be confined in the common jails of the country, and with all of our efforts to keep this class out of the jails we have now 437 applicants knocking at the doors for admission. Insanity is evidently increasing, and I fear beyond the increase in population of both white and colored.

HEALTH.

The general health of the Sanitarium has been fairly good for the past eight months when we consider the class of patients received, and that more than half of them were chronic cases, and many not only sick mentally but physically, old and feeble, living but a short time after admission. Considering the large number that have been under treatment during the past eight months we have had comparatively few cases of acute sickness. We have had a few cases of influenza throughout the building, several cases of chicken pox, and one case of smallpox. These were all in the white male department. The case of smallpox occurred in February, and was

brought to the Sanitarium accompanied by a certificate that there was no smallpox in the county. After being here a short while the eruption appeared on him, and he was immediately removed to the pest-house, and all recent cases that had not been successfully vaccinated were promptly vaccinated.

The most fearful malady that we have to contend with is tuberculosis. It is alarming with the colored population, and the decline with them is rapid, frequently living but a few months after the first indication of tubercular trouble. We have used all means at our command, in our crowded condition, to check the spread of it, but we have failed so far, while perhaps we have had a few cases less than last year. I have stated in former reports that I apprehended that we would not be able to prevent the spread of it until we could isolate each case promptly by putting them in buildings detached from the main building. I am sorry to say that insanity and tuberculosis seem to be increasing rapidly with the negro population.

By reference to the mortality tables you will see the causes of death, and it will be seen that but few died from curable diseases.

CONVICT AND CRIMINAL INSANE.

All of the dictates of humanity, right and justice to both the innocent insane and convict insane demand that there should be separate provision made for the convict insane. I feel that it is a reflection upon our humanity and Christian intelligence to force the innocent insane, on account of their affliction, to associate with the worst class of criminals. Such environment is not only dangerous and destructive to the welfare of the innocent insane but of all good discipline in a hospital for the ordinary insane. No hospital for the insane is built for the safe keeping of such a class, and it should not be; hence, it is a great injustice to society for many of them will ultimately make their escape. There is no good reason why there should not be established at some of the convict camps or convict farm a hospital for this class of our unfortunates. Convict camps are required to have hospitals for those that are physically sick and why not for those who are mentally sick. Such a hospital could be built without any expense to the State, or very little if any, as the hospital could be erected with convict labor, and in my judgment, if there was such a hospital in the State there would be far less feigning of insanity, for their chances of escape would not be so easy, nor would it be so difficult to recover

them if they did escape as they are thoroughly prepared to apprehend all who may, and thus protect society from the danger of such a class.

As to the criminal insane, I think that should be left to the discretion of the Court as to whether they should be sent to the Sanitarium or to the convict hospital, for injustice might be done an innocent person.

Below you will find the views of the most distinguished alienists known as to how the convict and criminal insane should be cared for.

I am indebted to Dr. P. L. Murphy, Superintendent of the Hospital for the insane at Morganton, N. C., and Dr. W. F. Drewry, Superintendent of the Hospital for the Insane at Petersburg, Va., for the following compilation, and I crave the careful consideration of the members of the General Assembly to the views of these distinguished alienists who have made a specialty of the care and treatment of the insane. They are acknowledged authorities.

Below you will find compilation of Drs. Murphy and Drewry of the most distinguished alienists in regard to the proper care of the convict and criminal insane.

In a message to the Legislature of New Jersey in 1897, Governor Briggs, now Attorney General of the United States, says he directs attention to the question of providing separate accommodation for the criminal insane: "First, because of the insecurity of the ordinary hospitals, their construction being such that there is no adequate guarantee against the escape of the criminal and consequent danger to society; second, that it is grossly unjust to other patients who have not a criminal history to be forced to associate with criminals and convicts."

Hon. William P. Letchworth in his work on "The Insane in Foreign Countries" says: "Separate provision should be made by every State for insane criminals. The necessity for this is so apparent, if considered only with reference to the right of the non-criminal insane, as seemingly to need no argument."

Dr. Isaac Ray, the author of "Ray's Medical Jurisprudence of Insanity," a work recognized as a leading authority by the Courts both of the United States and Great Britain, uses this language:

"This question seems to me to have been fully settled so far as the experience of those who are connected with the institutions for the insane are concerned. It is only a question whether a part of a hospital shall be made a prison, or a part of a prison be converted

into a hospital; and there can hardly be a question that the latter is the proper course, when for any cause, a State institution, especially devoted to this class of the insane, cannot be provided * * * * Having all of this convict class kept in one wing would not materially lessen the objections to such an association, for it would be so prison like in its appointments as to give character to the whole institution, and association upon the grounds could hardly be prevented. If there are not enough of this class in any one State to justify such a provision (a separate asylum), a portion of the prison should be given up to those thus afflicted, or a structure within the prison be put up for that particular purpose."

At the session of *La Societe Generale des Prisons*, held in Paris in 1895, the opinion was expressed by the Congress "that special asylums or quarters ought to be assigned for the confinement, by virtue of some judicial decision, of the insane tried by a Court and acquitted by reason of their mental state."

In a special report made to the Secretary of State by S. J. Barrows, Commissioner for the United States to the International Prison Commission, in 1898, the following language appears:

"Ask what a State does with its insane prisoners, ask how it protects society on the one hand and fulfills its duty to an irresponsible member on the other, and we may judge of its advancement in civilization by the response."

At the twenty-seventh annual meeting of the "Association of Medical Superintendents of American Institutions for the Insane" held in the city of Baltimore in 1893 the following preamble and resolutions, introduced by Dr. Pliny Earle, were unanimously adopted:

"WHEREAS, the President of the Board of Public Charities of Pennsylvania has requested that this Association should express its opinion in regard to the proper disposition of insane convicts; therefore,

"Resolved, 1. That neither the cells of penitentiaries and jails, nor the wards of ordinary hospitals for the insane are proper places for the custody and treatment of this class of the insane.

"Resolved, 2. That when the number of this class in any State (or in any two or more adjoining States that will unite in this project) is sufficient to justify such a course, these cases should be placed in a hospital specially provided for the insane, and that until this can be done, they should be treated in a hospital connected with some prison, and not in the wards or in separate buildings upon any part of the grounds of an ordinary hospital for the insane."

Dr. Archibald Church, of Chicago, an alienist and author of great reputation, presented, some years ago, to the Medico-Legal Society of New York, a valuable contribution, entitled "The Proper Disposition of the Criminal Insane," in which he laid down the following propositions, which afford material for thought and reflection:

1. "That in the proper disposition of the criminal insane, criminality alone should be the criterion of classification.
2. That the criminal insane should be cared for in separate institutions.
3. That insane criminals committing capital offenses should be sequestered during the period of their natural lives.
4. That insane criminals committing lesser offenses should be committed for periods equal to terms of imprisonment for their crimes made and provided, and as much longer as their insanity persists.
5. That the criminal insane may be liberated upon regaining their reason, by the pardon of the Governor, with the consent and recommendation of an advisory board."

Said Dr. E. G. Carpenter, a Superintendent, who for many years gave his best efforts to the care and treatment of the insane in a great Western hospital:

"It certainly must be sufficient misfortune to be bereft of one's mind, without awakening to find himself surrounded by men who have the habits, conversation, actions and instincts of those to be found only in the jail and penal institutions."

Dr. Arthur H. Harrington, Medical Director of the Massachusetts State Asylum for Insane Criminals, adds his testimony. He says:

"Actual experience has demonstrated, both from the material and moral standpoint, the disadvantage and the impropriety of treating under one roof the criminal and non-criminal insane. The comfort and liberty of innocent persons have often to be sacrificed for the sake of security, when there are upon the wards criminals who are still under sentence."

Mr. Clark Bell, of New York, a learned medico-legal jurist and author, says: "This offense against the insane by the States or authorities who commit it, is all the more indefensible because of the utter defenselessness of the insane themselves, even to protest against it * * * Forcing the innocent insane to consort with convicts is a crime of which the State that suffers it is guilty, and for which legislators should be held responsible."

To-day England, Scotland, France, Spain, Portugal, Belgium, Saxony, Hungary, Baden, Norway, Ontario (Canada), and the following States, viz: North Carolina, Ohio, New York, Massachusetts, Maine, Iowa, Michigan, Illinois and West Virginia has each either a separate special asylum for the criminal insane or separate department in connection with a prison, or perhaps in a distinct department of a hospital for the insane.

Dr. Wm. F. Drewry, Superintendent of the Central State Hospital at Petersburg, Va., says: "The State clearly owes it to her innocent insane, to her criminal insane, to the public—for the good of all—to provide special accommodations for the class under consideration. The State should no longer be direlict in her duty in this matter. She should follow the example of progressive States. North Carolina has, it seems to me, reached a fair solution of the problem, and Virginia would act wisely to adopt a plan in most respects similar to hers, the main features of which are as follows: A distinct department or hospital is provided at the penitentiary for the accommodation of the following classes: all convicts and persons convicted of crime becoming insane; all persons who commit crime while insane, and all who, charged with crime, are adjudged to be insane at the time of arraignment, and furthermore, persons accused of certain grave crimes and who have escaped indictment or been acquitted upon trial upon the ground of insanity or insufficient mental capacity to undertake his defense, or to receive sentence after conviction, are, in the discretion of the Court, committed to such hospital. Persons in the said criminal insane department are treated, cared for and maintained like patients in the State Hospitals. Their confinement is not regarded as punishment for any offense. Whenever one against whom an indictment for crime is pending, recovers, he is sent back to the Court to be dealt with according to law. Persons acquitted of a capital felony on the ground of insanity are discharged from this special hospital by act of the General Assembly. Those acquitted of crime of lesser degree and committed to said department are discharged upon order of the Governor. A person convicted of a crime and upon whom judgment was suspended on account of insanity, is released upon the order of the trial judge. If an insane convict is insane at the expiration of his sentence, he is kept in the department until he recovers or becomes incurable or harmless.

At the penitentiary or at the prison farm there should be erected a building designed and constructed on the hospital (though made

absolutely secure against escape), rather than the prison idea. Due regard, of course, shall be had to the separation of the sexes and the races. To this special department should be sent all the criminal insane now in the State hospitals or in the penitentiary, jails, and all those persons who shall hereafter come in the category of the criminal insane as designated in the first part of this paper.

Efforts are now being made to secure the passage by the Legislature of a bill offered in the House by an able young lawyer, which provides: "If any person convicted of crime and sentenced to confinement in the State penitentiary becomes insane during the term for which he has been convicted and sentenced, he shall be confined in a special ward in the State penitentiary to be set aside and reserved for such insane criminals." This is truly an effort in the right direction, and will doubtless lead to even better things."

FINANCES.

From the report of our faithful Steward you will see that the finances have been conducted with the strictest economy possible considering the welfare of the patients and the proper preservation of this large property. We should not lose sight of the fact that insanity means destruction, and it is frequently impossible to get the co-operation of the insane. On this account a hospital for the insane cannot be compared to any other hospital; hence, the necessity of such constant care and attention day and night, and also the necessity of daily repairs and improvements on account of the tendencies of many to destroy clothing, bedding, furniture, crockery, lights, etc., a great many of which cannot be foreseen or definite estimate made for. These taken jointly will of course make a slight fluctuation each year in the per capita cost. This depends largely upon the class of patients received each year and those on hand at the beginning of the year. Hence, in making provision for the insane or considering the expense of the insane these things should be taken into consideration. The per capita cost per diem for the past eight months is $30\frac{9}{100}$. This covers every expense of the Sanitarium. I regard this as a very satisfactory showing indeed when we consider the above facts, and the advance in prices of nearly all supplies for the support and maintenance of the Sanitarium. It is evident that much credit is due the Prudential Committee and our Steward for the wise and judicious management of the financial affairs of the institution.

TRAINING SCHOOL.

The good influence of the training school can be seen and felt throughout the institution in the efficiency of the service. Miss Cross continues the same interest in training the female attendants. This year she has given more time to bedside training than lectures.

Drs. Green and Walker have charge of the school in the colored department.

IMPROVEMENT AND REPAIRS.

By reference to the report of the Engineer you will see a detailed account of the improvements since September 1st, 1902, to May 1st, 1903.

ASSISTANT STEWARD.

By reference to the report of the Assistant Steward you will see the results of the garden, farm, dairies, etc., etc., which I think makes a very favorable showing. The yield of sweet potatoes was remarkably good, being 8,776 bushels. After having an ample supply for our entire household the Steward sold \$840.00 worth. This report shows a balance over all expenses of \$5,767.04. I regret, however, that I have to report that we lost 187 hogs from cholera; this includes pigs also.

STOREKEEPER.

By reference to the report of the Storekeeper you will see a detailed account of the conduct and management of that department. The Storekeeper and his Assistant have been faithful and attentive to their duties.

MATRON.

The report of our excellent Matron will show the amount of work done in her department; also the amount of fruit, vegetables canned, and preserves and pickles put up for winter use.

APOTHECARY.

The report of the Apothecary will give you an itemized statement of the amount of drugs purchased and the number of prescriptions filled together with the amount of drugs on hand.

*Annual Report of the***DENTIST.**

The report of the Dentist will show the amount of work done in that department, and the character of the work. It is my pleasure to say that he has been very attentive and patient in performing the duties of his office.

LIBRARY.

It is with gratitude that we acknowledge the contributions of books, papers, periodicals, etc., contributed to our Library by various humanitarians throughout the State. By reference to the report of the Librarian you will see a list of all those who so generously contributed so far as it has been able to ascertain. These contributions have added much to the comfort and welfare of the patients.

ATTENDANTS AND EMPLOYEES.

The attendants and employees as a general thing have been faithful and attentive in the discharge of their respective duties, which sometimes is under the most trying circumstances; all of which is fully appreciated by me.

OFFICERS.

It is gratifying to me to say that every officer has been faithful in the discharge of their respective duties. Much credit is due them for whatever good that has been accomplished.

RELIGIOUS SERVICES.

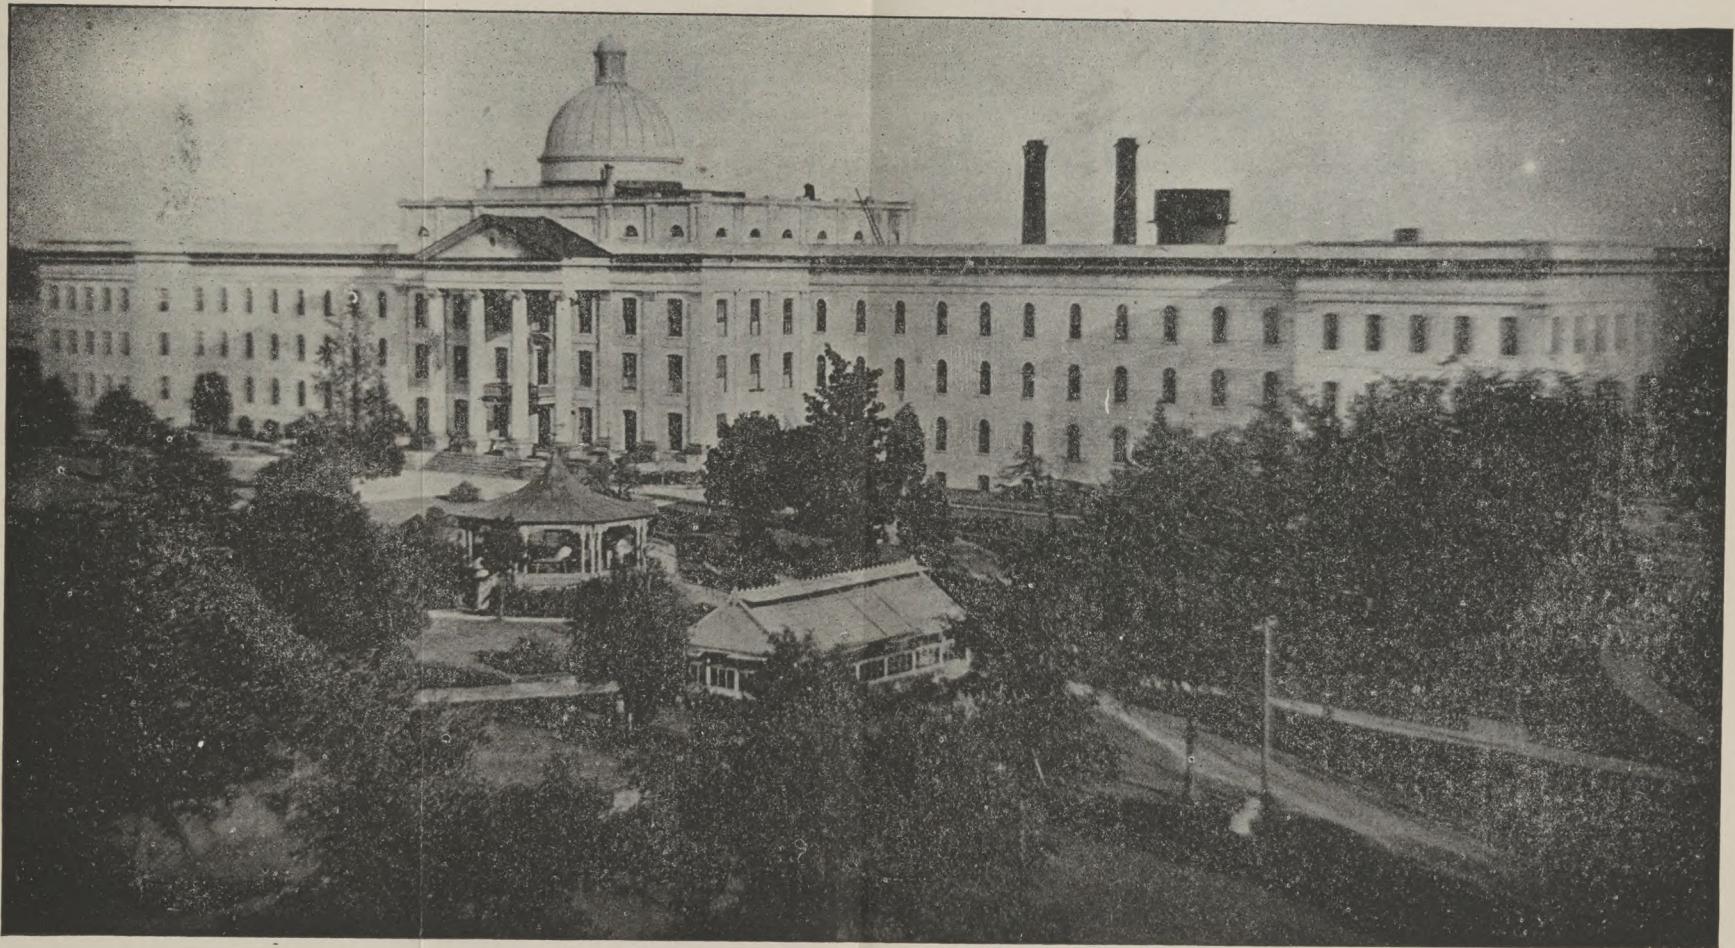

Religious services have been conducted regularly on Thursday and Sunday afternoons by our beloved Chaplain, Rev. M. L. Underwood, save when all gatherings were suspended on account of smallpox. The patients look forward to the coming of the Chaplain with real joy and delight. The attendance has been large and the conduct good.

CONCLUSION.

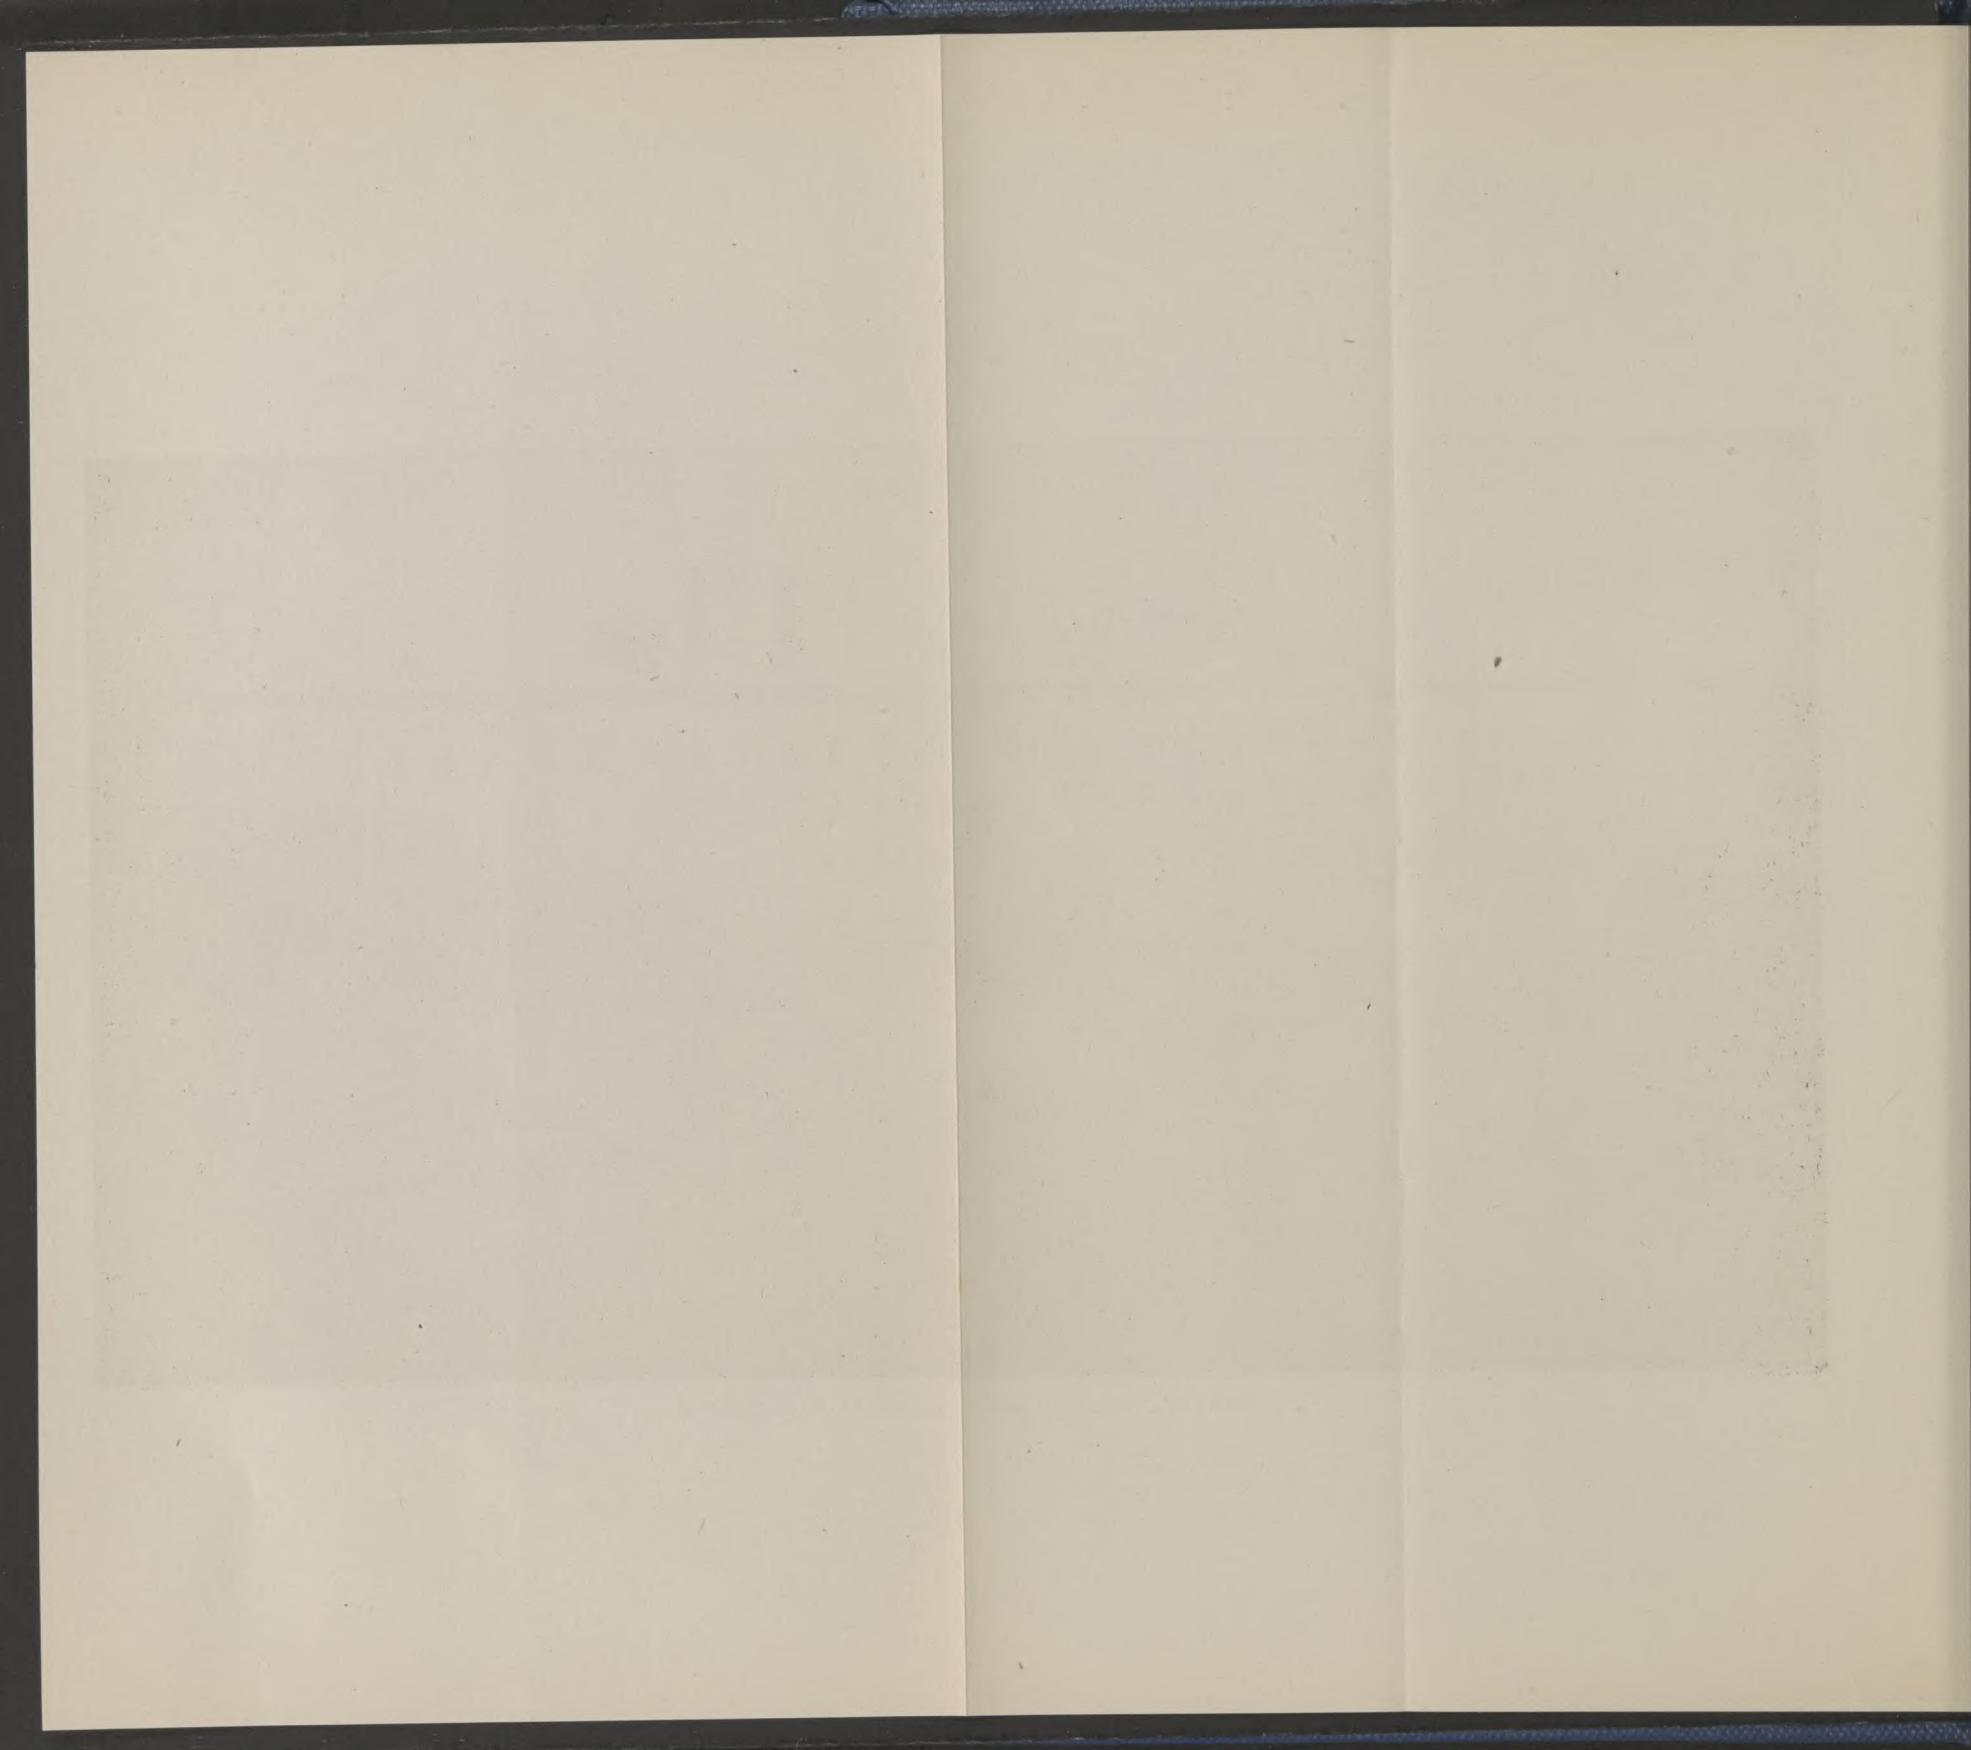

In conclusion permit me to express to each and every member of your Board my profound obligation for the kind consideration you have extended to me, and the hearty co-operation and support you have given me in the discharge of my duties, and for the wise counsel and advise. Invoking the blessing of God on our efforts in the future, I am,

Very respectfully,

T. O. POWELL, Superintendent.

CENTRE BUILDING GEORGIA STATE SANITARIUM.

Report of Pathologist.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—I present herewith a report of the work of the Pathological Department for the eight months from September 1st, 1902, to May 1st, 1903. The same general plan of work in this department as outlined in my report of last year is still being followed. A considerable amount of clinical work has been done in the laboratory which, because of its miscellaneous character, can not be presented in such a report. Below is to be found a synopsis of the autopsies done and some tabulated data derived from a study of the urine of new patients.

TABLE No. 1.
SYNOPSIS OF AUTOPSIES.

Case No.	Race.	Sex.	Age.	Mental Disease.	Duration.	Section Hours After Death.	ANATOMICAL DIAGNOSIS
227	C	M	30	Melancholia, acute.	4 mos.	14	Chronic meningitis. Pleuritic adhesion. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
228	C	F	50	Dementia, terminal.	5 yrs.	1½	Glandular tuberculosis. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
229	C	F	22	Melancholia, acute.	7 mos.	15	Pleuritic adhesions. Acute parenchymatous degeneration viscera. Typhoid ulcers in the intestines.
230	C	F	36	Mania, chronic.	10 yrs.	1½	General visceral tuberculosis. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
231	C	M	52	Mania, acute.	5 mos.	6	Acute meningitis. Chronic pleurisy with effusion. Fatty degeneration of the liver. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
232	C	F	71	Dementia, senile.	1½ yrs.	1½	Acute meningitis. Multiple cysts of the liver. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
233	C	F	25	Mania, acute.	2 wks.	5½	Pulmonary emphysema. Fatty degeneration of the liver.
234	C	M	50	Dementia, terminal.	1 year.	1	Cerebral effusion. Pulmonary tuberculosis. Tubercular pleurisy. Chronic nephritis. Chronic endarteritis. Fatty degeneration of the liver.
235	C	M	38	Melancholia, acute.	11 mos.	13	Cerebral effusion. Endothelioma of pituitary body. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart. Fatty degeneration of the liver.
236	C	M	60	Dementia, terminal.	20 yrs.	11	Old fracture of the skull. Tubercular pleurisy. Pulmonary tuberculosis. Chronic nephritis. Chronic endarteritis. Chronic valvular disease of the heart.
237	C	M	65	Dementia, senile.	5 mos.	3	Suppuration of frontal sinus. Absence of pineal gland. Chronic nephritis. Chronic endarteritis. Fatty degeneration of liver. Valvular disease of heart.
238	C	M	40	Epilepsy.	2 yrs.	7	Chronic meningitis. Absence of pineal gland. General visceral tuberculosis. Chronic nephritis. Fatty degeneration of the liver. Fatty degeneration of the heart.
239	C	M		Epilepsy.	2 yrs.	10	Pleuritic adhesions. Chronic valvular disease of the heart.

TABLE No. 2.
More Important Gross and Microscopical Changes in Brain and Meninges.

Case No.	Racee	Sex	Age	Mental Disease.	Brain weight grams	GROSS APPEARANCE	MICROSCOPICAL EXAMINATION
227	C	M	30	Melancholia, acute.	1450	Meninges are thickened and adherent. Convolutions are irregular in arrangement.	Not made.
228	C	F	50	Dementia, terminal.	1100	Nothing of special importance.	Marked sclerosis of ganglion cells.
229	C	F	22	Melancholia, acute.	Skull not opened.	
230	C	F	26	Mania, chronic.	1190	Meninges are congested.	Not made.
231	C	M	52	Mania, acute.	1235	Meninges acutely inflamed. Small sero-purulent effusion present. Brain congested.	Many cells are excessively pigmented. There is considerable sclerosis in the smaller ganglion cells. Vessel walls are thickened.
232	C	F	71	Dementia, senile.	1120	Meninges are the seat of diffuse inflammation and extensive pus formation.	Marked sclerosis and destruction of ganglion cells. Cells are excessively pigmented. Vessel walls are thickened.
233	C	F	25	Mania, acute.	1190	Pia mater congested. Brain is congested.	Slight chromatolysis is present throughout. Some pigmentation in frontal region. Vessel walls are slightly thickened.
234	C	M	50	Dementia, terminal	980	Cerebral effusion. Atrophy of convolutions.	Marked sclerosis. Some of the large motor cells are swollen and diffusely stained.
235	C	M	38	Melancholia, acute.	Cerebral effusion. A growth involving the pituitary body and floor of the third ventricle. Ventricles dilated.	Growth of pituitary body is an endothelioma. Cortex not examined.
236	C	M	60	Dementia, terminal.	Dura mater is thickened at point of an old injury. Atrophy of convolutions.	Not made.
237	C	M	65	Dementia, senile.	1140	Dura mater thickened and adherent. Atrophy of convolutions. Absence of pineal gland.	Many of the large motor cells show acute degeneration. The cells of the second and third layers show marked sclerosis and pigmentation.
238	C	M	40	Epilepsy.	1320	Dura mater is thickened and adherent. Pia mater is oedematous. Absence of pineal gland. Atrophy of convolutions.	Not made.
239	C	M		Epilepsy.	1430	Pia mater is oedematous. Atrophy of convolutions.	Not made.

NOTES ON AUTOPSIES.

A study of the cases which have come to autopsy shows that chronic disease of the arteries ranks first as regards frequency of the general diseases. The arteries were found to be diseased in 92.3 per cent. of cases.

Chronic nephritis could be demonstrated by the gross appearance in 76.9 per cent., and a microscopical examination shows this disease to be present in 84.6 per cent.

Valvular disease of the heart comes third in point of frequency, being present in 69.2 per cent.

Tuberculosis was found in 30.7 per cent. of all cases.

The following cases have presented some features of such importance that they deserve special mention.

Case 229. This was a case of typhoid fever in which the clinical signs of the disease had been present for six days. On autopsy typical typhoid ulcers of the third week of the disease were found throughout the ilium.

In cases 237 and 238 there was a complete absence of the pineal gland. In neither case had there been any symptoms attributable to this abnormality.

Case 235 presented a small soft growth involving the pituitary body and the floor of the third ventricle. The growth proved upon examination to be an endothelioma. The patient had shown symptoms of disease at the base of the brain, but none pointing to an involvement of the pituitary body. In view of the work which has recently been done relative to the function of this organ this case is of considerable interest.

TABLE No. 3.

Synopsis of analysis of urine of patients at time of admission.

I wish to express to you, and to the various members of the staff, my appreciation of the assistance given me in the work of my department.

Respectfully,

M. L. PERRY.

Report of Treasurer.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

MY DEAR SIR:—I herewith submit my report for the eight months commencing September 1st, 1902, and ending May 1st, 1903.

Yours very truly,

C. H. TROUTMAN, Treasurer.

Report of Steward.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—I have the honor to transmit to our Honorable Board of Trustees, through you, this my report as Steward from September 1st, 1902, to May 1st, 1903.

Abstract "A" shows the balance brought forward from last fiscal year, the amount drawn from the State Treasurer for support and maintenance of the Sanitarium, together with a classified statement of the disbursements; also the balance on hand to be carried forward to next year.

Abstract "B" shows in detail the expenditures on account of Subsistence.

Abstract "C" shows in detail the expenditures on account of Clothing.

Abstract "D" shows in detail the expenditures on account of Fuel and Transportation.

Abstract "E" shows salaries paid Officers.

Abstract "F" shows wages paid Employees.

Abstract "G" shows in detail the expenditures on account of Incidental Expenses.

Abstract "H" shows in detail the expenditures on account of Medical Supplies.

Abstract "I" shows in detail the expenditures on account of Contingencies.

Abstract "J" shows in detail the expenditures on account of Stationery and Postage.

Abstract "K" shows in detail the expenditures on account of Special Appropriation for erecting new buildings and for other purposes, also the balance on hand to be carried forward to next year.

Abstract "L" shows the requisitions drawn on the State Treasurer in their regular order for support and maintenance of the Sanitarium.

Abstract "M" shows the average number of patients from 1873 to 1903, together with the per capita cost per diem and per annum.

Abstract "N" shows the cost of maintaining one patient, by the year, month, week and day.

Our Store Keeper, Mr. W. H. Hunter, reports stock on hand \$11,890.62.

Our Apothecary, Mr. D. S. Carrington, reports stock on hand \$1,685.75.

Our per capita per diem is 30⁹⁵/₁₀₀ cents.

By reference to report of Mr. Geo. W. Hollinshead, Assistant Steward, you will see results of farm, garden, dairies, hogs, &c. Also a report of stock, wagons, utensils and implements on hand. I have availed myself of all cash discounts. All old iron, barrels, sacks, tar, etc., have been disposed of and amount realized from sale of same transferred to petty cash account, and disbursed in purchasing country produce. As required by law duplicate vouchers of the expenses, accompanied by the required certificate approved by yourself and audited by the Trustees, have been filed in the Executive Department in Atlanta. I have devoted my entire time to the duties of this office. With renewed expressions of gratitude to our honorable Board of Trustees and yourself, I am

Very respectfully,

LUCIUS J. LAMAR, Steward, G. S. S.

Report of Assistant Steward.

GEORGIA STATE SANITARIUM,

NEAR MILLEDGEVILLE, GA., May 1st, 1903.

Mr. L. J. Lamar, Steward:

DEAR SIR:—I herewith hand you my report as Assistant Steward for the past eight months, beginning September 1st, 1902, and ending with April 30th, 1903, of the Dairies, Garden, Farm, Park and Transportation. Also a statement of Stock, Wagons, Etc., on hand May 1st, 1903. We have had cholera in a part of our hogs the past few months by which we have lost 187 head.

Very respectfully,

GEO. W. HOLLINSHEAD, Assistant Steward.

OLD DAIRY.

Report of Dentist.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR DOCTOR:—The following is a report itemizing the Dental Treatment and Operations of this department from September 1st, 1902, to May 1st, 1903:

Tumors removed	1
Alveolar Abscesses treated	41
Periodontitis treated	14
Stamatitis treated	4
Pyorrhœa Alveolaris treated, number of patients	25
Acute Odontalia treated	7
Calcarious deposits removed, number of patients	51
Pulps Devitalized, removed and cavities and pulp canals filled	28
Putrescent Pulps, removed, tooth treated, cavities and pulp canals filled	32
Cavities filled with Oxyphosphate Zinc	155
Cavities filled with Amalgam	253
Cavities filled with Guttapercha	1
Cavities filled with Gold	57
Crowns made	1
Bridges reset	2
Artificial Dentures made	5
Artificial Dentures repaired	3
Hypersensitive teeth from erosion or attrition cauterized with Nitrate of Silver	2
Fractured bone removed, number of patients	1
Teeth cleaned, number of patients	7
Teeth and roots badly decayed, ulcerative and offensive, extracted ...	3,079
Number of patients during the month	1,070
Collected from patients for materials not furnished by the institution	\$57 05
Collected from outsiders for extracting teeth	1 00
Total	\$58 05

The above amount turned over to L. J. Lamar, Steward.

Respectfully submitted,

J. C. RICHARD, Dentist.

Report of Apothecary.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—The following is my report of the Apothecary Department for the past eight months up to May 1st, 1903.

It is the policy of this department to manufacture all pharmaceuticals, and preparations, used by the institution, and we have done so at all times, where it was economy to do so, restricting purchases solely to chemicals and such specialties as are required by the physicians.

Respectfully submitted,

D. S. CARRINGTON, Apothecary.

STATEMENT.

Amount of drugs purchased, including druggist sundries, dental and laboratory supplies.....	\$ 1,587 96
Alcohol and whiskies.....	308 19
Wines	29 75
Preparations for fumigation, disinfecting and sanitary purposes..	145 30

Amount of drugs on hand	1,685 75
Fixtures, apparatus, etc.....	385 50
Number of prescriptions filled.....	14,299

Report of Engineer.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—I have the honor to submit herewith my report of the workings of this department from September 1st, 1902, to May 1st, 1903.

Respectfully,

T. H. DE SAUSSURE, Engineer.

IMPROVEMENTS

NEW BUILDINGS.

The new buildings authorized by the appropriation of 1900 have been completed so far as the contract with the builder calls for. These are twin structures, each consisting of a central octagon, four stories high, with four wings three stories high radiating therefrom. There is placed between the two buildings a dining hall with a kitchen and boiler room attached. Of the eight wings three remain unfinished internally.

COTTAGE.

There has been begun a five room cottage, intended as a residence for one of the officers. This, it is expected, will be completed in about two months' time.

BUILDINGS AT COLONY FOR NEGRO MEN.

At the colony for negro male patients, there has been put up three frame buildings, each to accommodate forty patients, one-third of whom will be cared for in single rooms, and the remaining two-thirds in dormitory.

A system of waterworks for the colony has been begun. This contemplates the building of a dam across a branch some thirty-five hundred feet distant from the buildings, making a pond of about

two acres in extent, the erection of a steel tower and tank at the buildings, and the installing of two hydraulic rams for raising the water. This work is well under way.

TELEPHONE EXTENSION.

One new instrument has been added to the exchange and both of the new buildings have been internally wired for placing a telephone on each ward.

PLUMBING.

Besides much general repair work, three new enameled iron bath tubs have been placed on the wards, and one urinal cistern. New hot water pipes have been run from the water heaters to the entire west half of the main female building.

CARPENTRY.

Four sun rooms and the corridor of one ward, and fifteen single rooms have been newly laid with rift pine flooring. Two hundred and eight bedsteads and one thousand bedstead side rails have been made and varnished. The walls of all the strong rooms in the main female building have been painted, and the woodwork of two entire wards has been scraped and repainted.

GRADING.

A roadway has beeen built to the new buildings, necessitating the moving of some 8,250 cubic yards of earth.

A ditch has been dug near the waterworks, turning the water of Finegan's branch, which had become polluted, into Camp creek below the pumping station.

In the upholstering shop the following work has been done:

- | | |
|--|---|
| 63 Tables repaired. | 4 Washstands repaired. |
| 297 Chairs reseated. | 1 Tub repaired. |
| 47 Chairs reseated and backed with cane. | 1 Bracket repaired. |
| 1 Sofa repaired. | 1 Shelf repaired. |
| 2 What-nots repaired. | 6 Iron bedsteads repaired. |
| 10 Bureaus repaired. | 6 Woven wire mattresses repaired. |
| 3 Lounges repaired. | General harness repair, using three sides of leather. |
| 3 Trunks repaired. | |

Besides the usual amount of ordinary repair work, the following articles have been made by the carpenters:

- | | |
|---|--------------------------------|
| 200 Coffins. | 11 Flights of steps. |
| 59 Boxes for shipping coffins. | Flooring two sun rooms. |
| 24 Small voucher boxes. | Flooring one corridor. |
| 1 Large voucher box. | Flooring fifteen single rooms. |
| 4 Double clothes racks. | 9 Bread paddles. |
| 4 Commodes. | 13 Lattice doors. |
| 1 Reel house. | 1 Gate for farm." |
| 208 Bedsteads. | 1000 Bedstead side rails. |
| 1 Small house, 10 x 10 feet. | 1 Door frame. |
| 1 Panel door. | 13 Shuck mop handles. |
| 72 Hoe handles. | 75 Dining tables. |
| 1 Crutch. | 3 Wagon tongues. |
| 1 Wagon bolster. | 9 Feed troughs. |
| 2 Wagon frames. | 1 Ox yoke. |
| 6 Shuck mops. | 12 Rammers. |
| 3 Tool boxes. | 2 Stepladders. |
| 16 Sink tables. | 5 Medium cases. |
| 6 Night-watch key boxes. | 28 Wall boards for telephones. |
| 3 Large cupboards. | 1 Box for records. |
| 5 Cases for Apothecary, with
shelving, drawers and cup-
boards. | 36 Transom bars. |
| 6 Lattice benches. | 39 Wood rims for hoppers. |
| | 4 Mantel pieces. |

Report of Matron.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—Permit me to submit the enclosed as my report for the eight months ending May 1st, 1903. I would add that repairing has been done for the institution and all scraps and remnants have been put to a good use, and have been properly accounted for through the Storekeeper's office.

All of which is respectfully submitted.

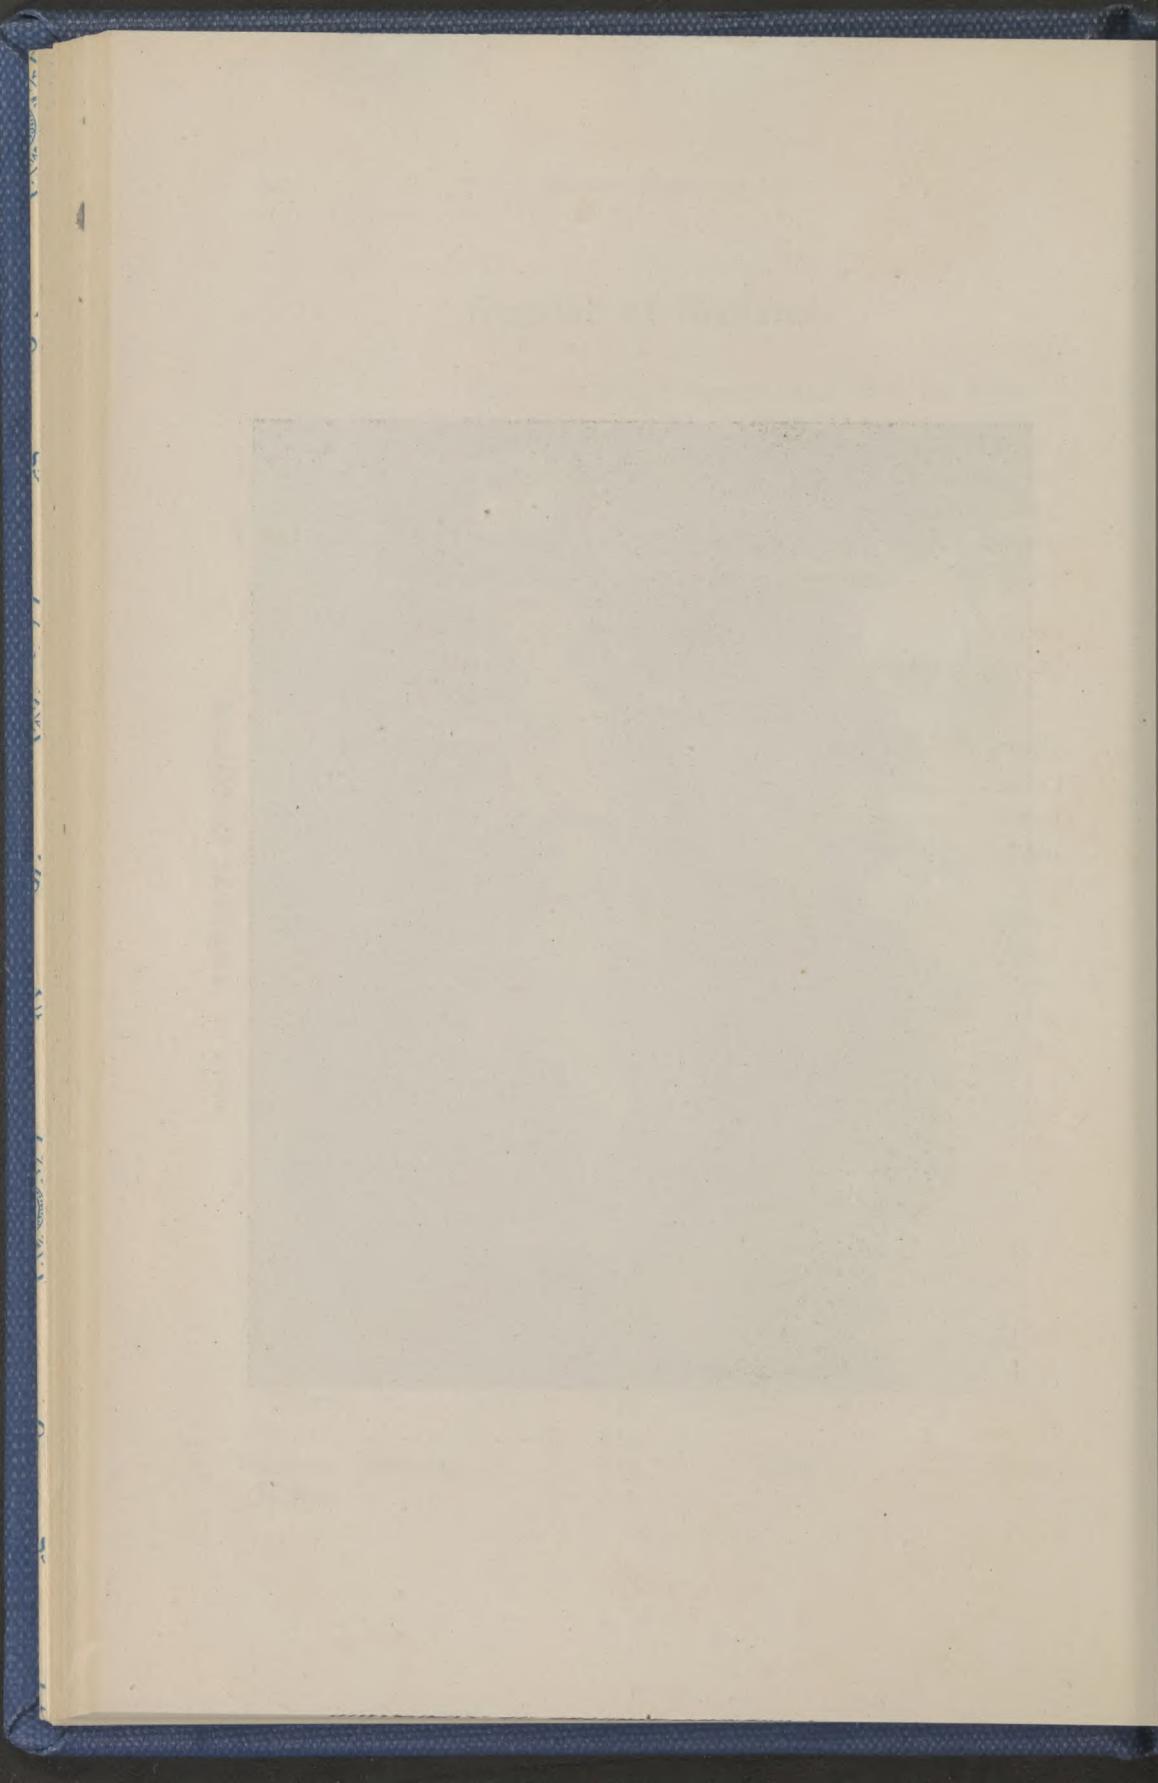

MRS. J. M. DARNELL, Matron.

Report of Chaplain.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent.

DEAR SIR:—I beg leave to submit the report of the Chaplain for the eight months ending May 1st, 1903. Religious services have been held twice a week, Sunday and Thursday afternoons, for the inmates of the institution when not providentially hindered. It is gratifying to report that the attendance has been good and the order perfect. The patients seem to be easily managed by the gentle methods adopted. They appreciate the Chapel services, which, I think, are productive of good.

The song service is conducted by our efficient organist, Mrs. Julia West, participated in by a large number of the congregation. This part of the service is especially enjoyable. Funeral exercises are held over all deceased patients who are not carried home for interment. Pastoral attention is cheerfully given the sick when advisable.

We are pleased to state that the Superintendent, and his efficient assistants, and all attendants, have shown us every courtesy.

Respectfully submitted,

M. L. UNDERWOOD, Chaplain.

Report of Librarian.

GEORGIA STATE SANITARIUM, May 1st, 1903.

Dr. T. O. Powell, Superintendent:

ANNUAL REPORT
OF THE
BOARD OF TRUSTEES
OF THE
Georgia State Sanitarium,

For the Eight Months Ending Jan. 1st, 1904.

MILLEDGEVILLE, GA., Jan. 1st, 1904.

To His Excellency, Joseph M. Terrell, Governor:

SIR:—In obedience to statutory requirement, and in compliance to recent change in such statute, the Board of Trustees of the Georgia State Sanitarium has the honor to submit herewith its report of the conduct and management of the Sanitarium for the eight months ending January 1st, 1904.

Attached hereto, and forming, a part of this report are the reports of the Superintendent and Resident Physician, Steward-Treasurer, and other officers of the institution setting forth in detail the movement of its population, and giving the history of every dollar expended for its support. To these you are respect, fully referred for details as to its management.

NUMBER OF PATIENTS.

The importance of this great work to the State of Georgia is plainly apparent when it is known that in the eight months covered by this report 3,286 patients have received treatment at this institution, the daily average under treatment being 2,770. The population of the Sanitarium on May 1st, 1903, which was the date of our last report was 2,716. In eight months 570 patients have been received, and there have been discharged, eloped or died, 472, leaving a net gain of 108 patients, and making the population to-day 2,824.

The daily average under treatment was 74 more than last year.

PERCENTAGE OF RECOVERIES.

The Board is gratified to be able to report that the percentage of recoveries in eight months based on the number of admissions in that time was $43\frac{1}{3}$ per cent. This is a very satisfactory showing.

INCREASE IN INSANITY.

The attention of your excellency is directed to that part of the Superintendent's report dealing with the increase of insanity in Georgia and elsewhere. This feature of his report has been prepared with much care, and is of such great importance as to merit your careful consideration.

CONVICT AND CRIMINAL INSANE.

The Board would respectfully renew its previous recommendations that provisions be made elsewhere for the care of the insane convicts and the criminal insane. The injustice of forcing the innocent insane to associate with these classes is apparent to everyone. The innocent insane are by no means devoid of natural sensibility, and such forced association is not only extremely repugnant to them but it is hurtful as well. Other progressive states are making separate provision for this class, and Georgia can well afford to do likewise.

CHRONIC AND INCURABLE INSANE.

Many of the patients received into the institution since the last report of the Board have been chronic and incurable cases, which there is little hope of benefiting by treatment in the Sanitarium.

Most, if not all, of these are harmless imbeciles or idiots who could be well cared for at home by the counties from which they came. Their presence in the Sanitarium takes up valuable room which should be had for the reception of acute, hopeful cases of insanity that might receive benefit from treatment in the institution.

TUBERCULOSIS WARDS.

The increase of this dread disease among the negro insane causes the Superintendent much concern. Fifty per cent. of the deaths among the negro patients in the last eight months is due to this disease. As a race they seem peculiarly subject to it. Nor is the trouble confined to negroes alone for a few cases are found

among the whites. Modern science has demonstrated the extremely infectious nature of this disease, and the vital necessity of complete isolation if it is to be controlled. The Sanitarium has no facilities for this purpose, and provision should be made as early as possible for supplying this need. Frame buildings could be erected of suitable size at a cost of twenty-five hundred dollars each, and it will require four such, one for each sex of each race.

LIBRARY.

There are many persons in the State who will be glad to contribute an occasional book or magazine to the Sanitarium library if they felt such contribution would be of value. Not a few of the patients derive great pleasure as well as benefit from the use of the library, and the Board will gladly pay the express charges on any such contribution as may be sent to the institution.

To the stricken Georgians here a glimpse of their home papers affords much pleasure, and it would be a source of gratification to the Board if all the newspapers in the State, both daily and weekly, would put the Sanitarium Library on their mailing lists.

RECREATION AND EMPLOYMENT.

Every effort with the means in hand is put forth to provide the patients with such amusements as they are capable of appreciating and enjoying. Such pleasures constitute a valuable factor in the treatment of the insane, and it is a source of much regret to the Board that the means at its disposal do not permit it to provide a greater diversity of such amusements. Employment is another valuable factor in such treatment, and as many of the patients as express a desire to work are furnished with such employment as is best fitted to their physical condition. Fully sixty per cent. of the recoveries are from those who are thus employed.

FARM COLONY.

Four comfortable frame buildings, have been erected at the colony, and about seventy negro male patients are quartered in them. A dam has been built across a nearby stream, two hydraulic engines have been installed, pipes laid and a steel tower and tank erected; thus furnishing to the colony a supply of excellent water. The buildings are lighted with acetylene gas. This colony is located four miles away from the main buildings, and the patients

who are thus colonized are employed in light farm work. The Steward's report will show the expenditures made from the special appropriation for this purpose.

THE FARM.

The Sanitarium is now cultivating, approximately, eight hundred acres of land most of which is cultivated by means of the labor of the patients under the watchful supervision of the Assistant Steward, who is likewise charged with all the outside business of the Sanitarium, including the gardens, dairies and laundry. His report gives in detail the work done in his department, and for which he deserves much praise.

THE NEW BUILDINGS.

The new buildings were opened for the reception of patients in November last, and the overcrowded condition of the old buildings was thus relieved, 450 of the patients in them being at once transferred to the new.

Three wings of these buildings remain unfinished interiorly. A satisfactory contract being offered by a local company it was accepted and these buildings are lighted by electricity. The Steward's report will show the amount expended of the special appropriation for equipping and lighting these buildings.

COST OF MAINTENANCE.

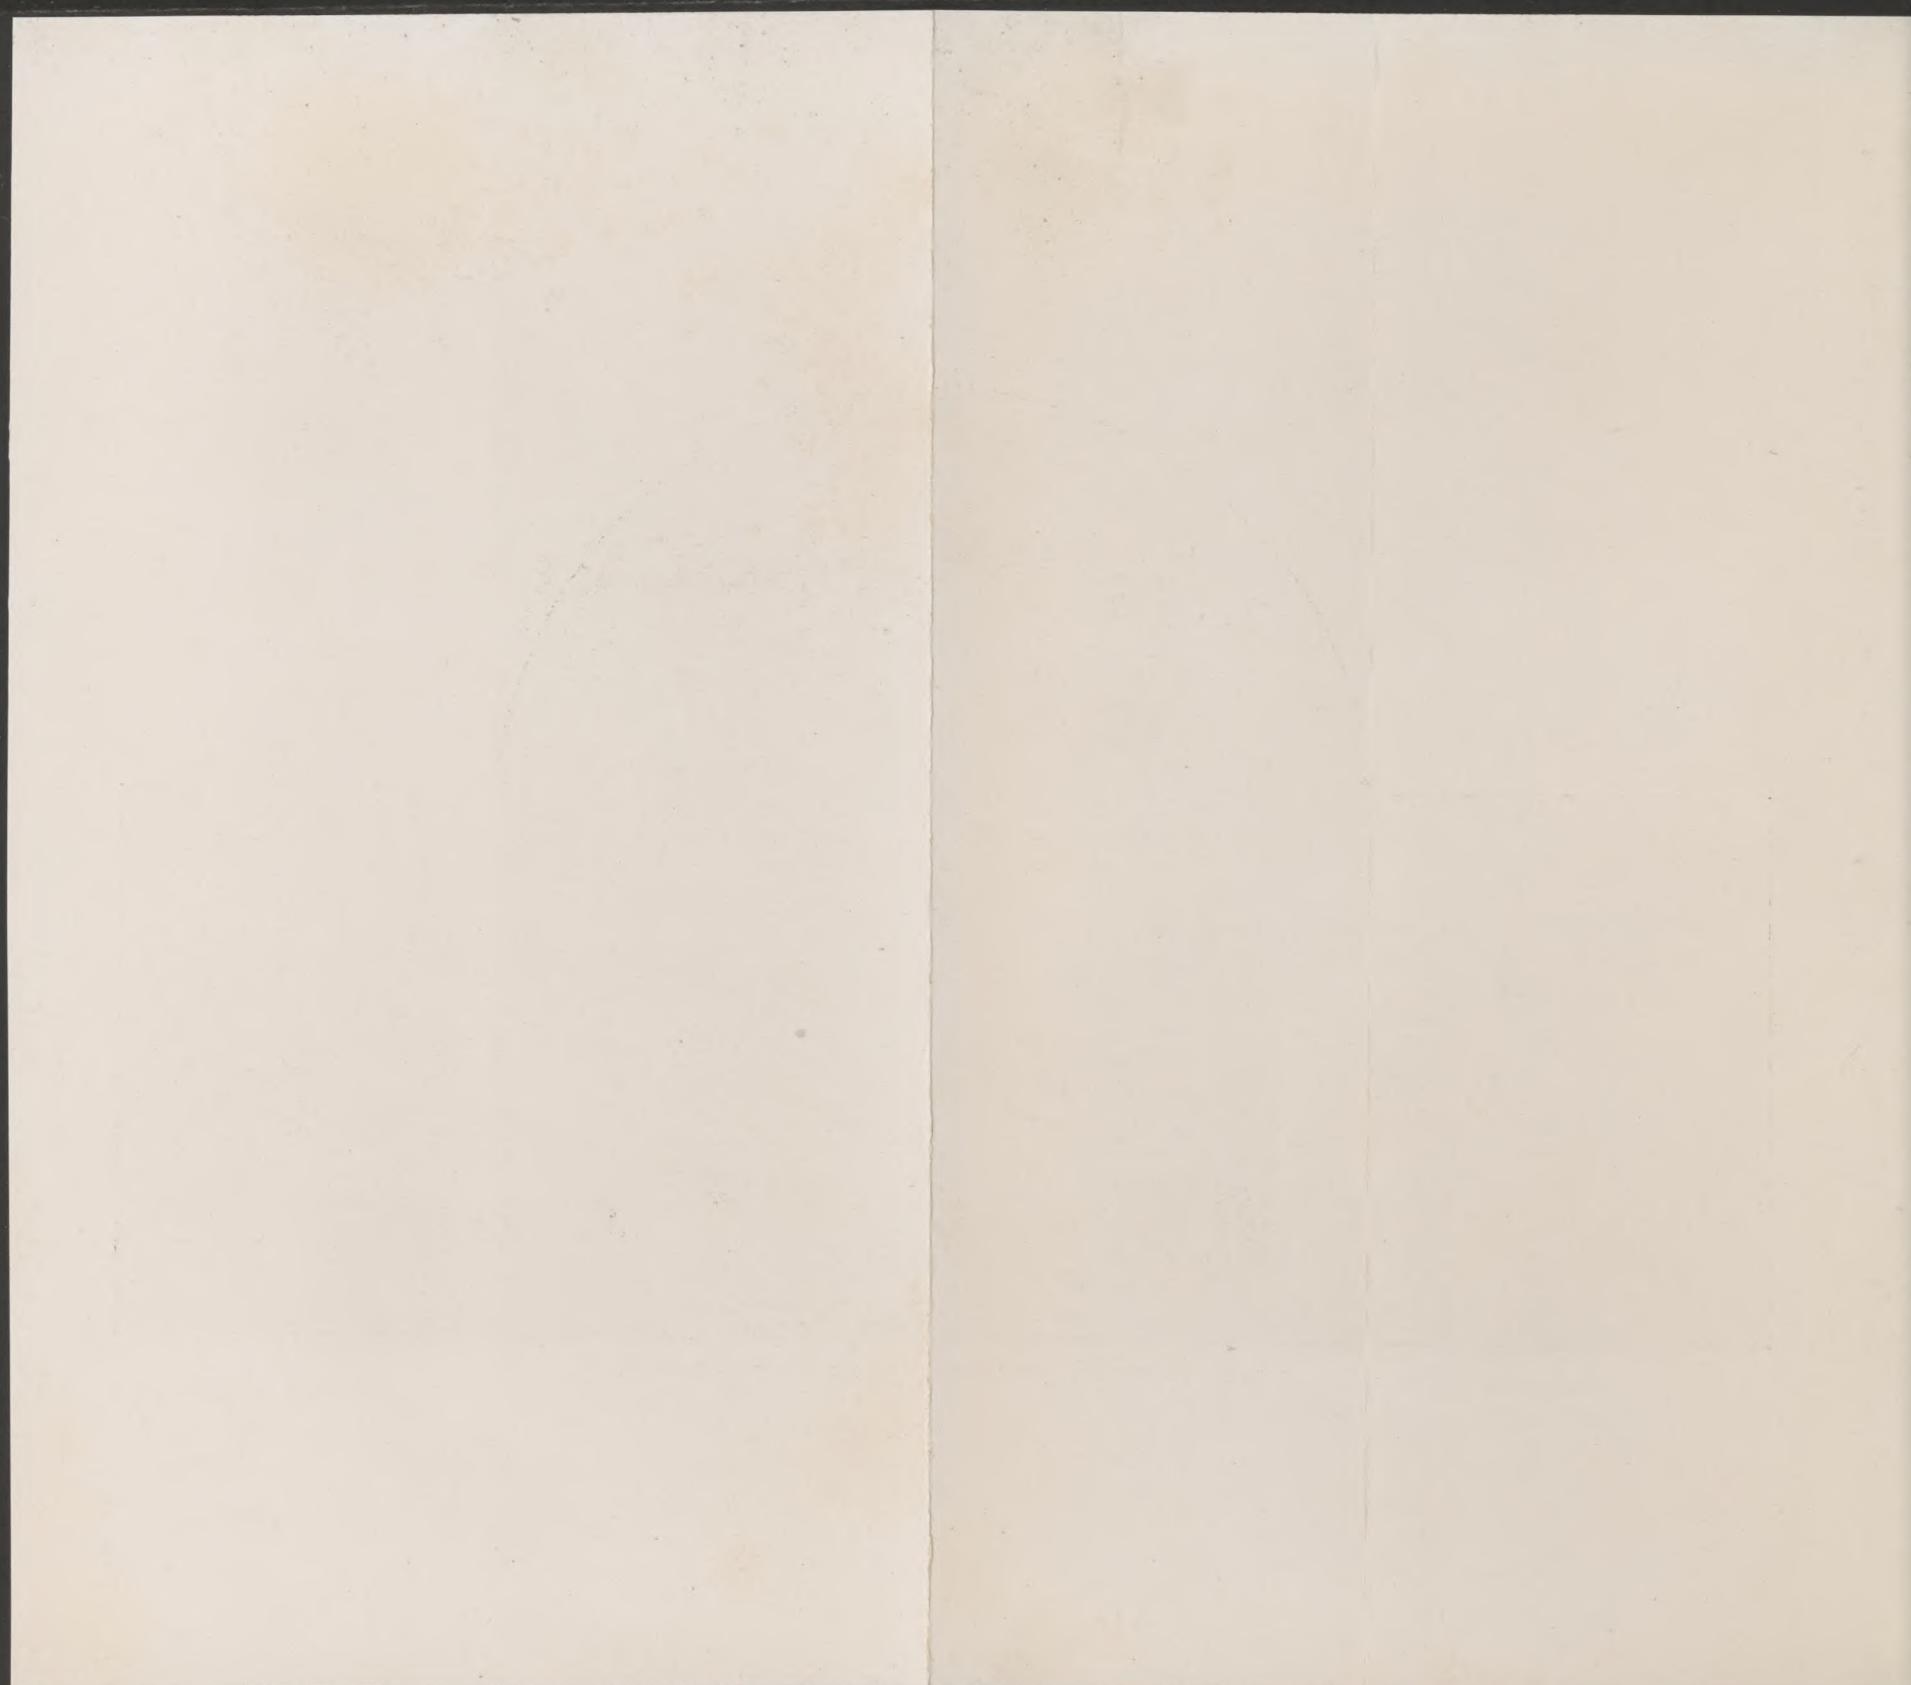

The financial condition of the Sanitarium on January 1st, 1904, is as follows:

Cash in hands of Treasurer, May 1st, 1903.....	\$ 8,402.40
To which is added eight month's receipts from the State Treasurer.....	216,666.68

Making a total of.....	\$225,069.08
There has been expended in eight months for	
Subsistence	\$72,497.98
Clothing	24,116.62
Wages	51,050.45
Fuel and Transportation	21,895.15
Salaries	17,024.60
Incidentals	14,024.45
Medical Supplies	2,303.75
Contingencies	831.02
Postage and Stationery.....	734.80
 Making a total cost to the State of.....	\$204,478.82
Leaving a balance in the hands of the Treasurer	20,590.26

ONE OF TWIN BUILDINGS NOW IN PROCESS OF ERECTION.

AVERAGE DAILY COST OF EACH PATIENT.

The daily average of patients under treatment in eight months was 2,770, the total cost was \$204,478.82, making the average daily cost of each patient .3012, which is the lowest per capita cost with but one exception of any year in the history of the institution.

COST IN COMPARISON WITH SIMILAR INSTITUTIONS.

From a statistical table compiled by the Board of Charities of the State of Washington giving the maintenance cost of 100 hospitals for the insane in the United States, the Board gathers the following information: Out of the 100 institutions thus reported but four only had a lower per capita cost than Georgia. Of these four the information of the Board is that two receive pay patients, one does not include the salaries of its officers in its cost, and the remaining one is for negro patients exclusively. The average cost per patient of the Georgia State Sanitarium for the two years included in the above statistics—1901 and 1902, was .3058. Its cost last year was .3012. With these facts before it the Board feels it is safe to presume that the Sanitarium is to-day maintained at a lower cost per patient than any similar institution of the same class in the United States.

The Board does not point to this record with pride for it is convinced that the stringent economy necessary to effect such a record works an injury to the stricken citizens in its care. The instincts of humanity demand that every possible aid be given them towards recovery, and the best interests of the State demand not only that such aid be given them, but that the per capita allowance be sufficiently large to keep the immense property of the State in substantial repair. As an illustration the Board would state that much of the plumbing in the institution is old and obsolete, and its continued use is a constant menace to the health of the inmates. The per capita allowance should be large enough to enable the Board to make such repairs as this as the necessity arises without having to wait for a session of the Legislature in order to secure a special appropriation for such purposes.

In the judgment of the Board thirty-five cents per day for each patient is none too much for the State to allow for their support. Out of this allowance would be paid all the expenses of the institution including salaries of the officers, wages of the employees, and the expense of keeping the vast property of the State in good and substantial repair.

TREASURER'S OFFICE.

On the 17th of October, 1901, at and before the election of the Treasurer, the Board passed a resolution looking to the discontinuance of the Treasurer's office, if the State should during his term impose the duties thereof on the State Treasurer.

On the 20th of August and again on the 18th of September, 1902, resolutions to the same effect were passed by the Board, and our immediate Representative and Senator were thereby requested to lend their aid to secure the transfer of the main receipts and disbursements of the Treasurer's office to the State Treasurer. The change however, contemplated the payment of such sums to our Steward as might be required on his estimates to meet the daily, weekly and monthly current expenses of the institution, such sums to be paid directly to him, to be covered and secured by his bond.

This change is advisable, for the fund appropriated from time to time for the support and maintenance of the institution is large, and if it were disbursed by the State Treasurer, and the accounts kept on separate books in his office, it would at all times be accessible and subject to inspection by the Governor and the General Assembly of the State.

A DAY'S WORK OF THE MEDICAL DEPARTMENT.

In view of the fact that the annual reports of the Board are not restricted in their circulation, to those officially interested in the work of this institution, and inasmuch as layman and general practitioners of medicine read them in order to know something of the details of this great public charity, the Board has thought proper to briefly set forth an outline of some of the more important features of the daily routine of the medical department, because it will facilitate a clearer understanding of the carefully prepared statistical tables in which records the work of this institution is condensed.

The magnitude of this work, and the immense amount of detail associated with the care and management of 2,824 patients, calls for thorough organization in every department. Each physician on the Staff has his specific duties to perform under the direction of the Superintendent and Resident Physician. Supervisors are allotted a given number of wards in which they are held strictly responsible for the service of the nurses, and where they must preserve discipline and see that the ward attendants are properly discharging their duties. It further devolves upon them to watch

carefully the wants and needs of the patients, report upon sanitary conditions, record the ward temperature, and be the constant medium of communication between the ward and the medical officers. The inspection of meals devolves upon the Assistant Physicians, who are required to make daily report thereon to the Superintendent.

The patients are housed in eleven great buildings, which contain approximately sixteen acres of floor space divided into seventy-two wards, all of which are in telephonic communication with the Superintendent. Each of these wards has its head nurse, upon whom devolves the weighty responsibility of caring for the patients in that ward. At five o'clock, a. m., the rising whistle blows, and 2,824 patients with their nurses arise, and the hospital day is begun. The feeble and untidy are washed and dressed by the nurses, the strong and robust are educated to care for themselves; the wards and rooms are flushed out with pure air, and systematic housekeeping is begun. Breakfast is served in thirty-nine dining rooms to nearly 3,200 persons at seven o'clock. The bed-ridden are served in their own rooms. At nine o'clock the Supervisors make their reports to the Superintendent. These are in the form of tabulated statements prepared by the head nurse of each ward, setting forth in detail the care and condition of the patients in that ward, accidents, if any, property destroyed, etc., constituting a complete history of the day's work in the wards under their charge. In addition a verbal report is made by the Supervisor. Requisitions for needed supplies, such as clothing, bedding, furniture, etc., are submitted to the Assistant Physician in charge of that service for his approval, and they are then sent to the Storekeeper, who fills them.

At nine o'clock the Assistant Physicians begin their rounds, and when this work is completed they report to the Superintendent for conference and instruction. Their rounds cover every part of the buildings where patients are confined. Each of them is subject to call day and night at any moment when the condition of a patient in his service demands his attention, or an emergency arises. They are required to give careful attention to everything pertaining to the care and treatment of the patients, such as diet, baths, medicines, etc. The very sick are sent to the infirmaries where they are placed in charge of trained nurses. These infirmaries are the most attractive wards in the institution.

The Superintendent is subject to the call of the Assistant Physicians when a consultation with him is desired, and the infirmaries are visited by him as often as may be necessary.

At nine o'clock p. m., the day nurses, after sixteen hours of service, deliver their patients over to the night nurses, under whose watchful care they remain until morning. This in brief is the daily routine of duties of the medical department of the Sanitarium. When the large number of patients who are homicidal or suicidal, or who are pyromaniacs, is considered, making the danger of a homicide, a suicide, a fire or other distressing accident an ever present one, it is not hard to understand the vital necessity for sleepless vigilance upon the part of those who have them in charge.

THE OFFICERS.

The visitor to this great institution is at once impressed by its vast proportions. A stay within its walls makes an even deeper impression. He notes the quiet, orderly manner in which the work of so great an institution is dispatched. He sees no confusion. Everything moves with regularity and celerity. Each officer and employee has his specific duties, and performs them promptly; the utmost harmony prevails. Instinctively he looks for the executive head of such a perfect system, and finds him, modest unassuming, golden-hearted gentleman and Christian physician that he is, shrinking from the praise so justly his due, and generously giving all the credit to his associates. To Dr. T. O. Powell, who since 1879 has been at the head of this great institution as Superintendent and Resident Physician, and whose connection with it began in 1862, the people of Georgia and the lovers of humanity everywhere owe a debt of gratitude and affection they can but faintly realize, and can never pay. Only those who are engaged in similar work can appreciate the weight of responsibility which rests upon his shoulders. The signal success of his administration attests his splendid executive ability, his fidelity to his duty and his professional skill. His devotion to his work can only spring from a genuine love for it. To the Board he is ever deferential, ready and willing always to meet every duty imposed upon him; to his associates he is both friend and adviser; to his employees he is firm in his demands and generous in his praise; to the patients he is the tender hearted physician, and to everyone he is ever the courtly gentlemen, considerate always of the

sensibilities of others. The Board feels that it would be direlict of its duty did it fail to put on record its appreciation of his services, and its affection and admiration for him personally.

He is loyally and ably supported in his work by the entire official Staff of the Sanitarium, and the Board feels that the State is to be congratulated upon the faithful and efficient work rendered by each member of it. The Board has much pleasure in expressing its warmest appreciation of such services.

RECOMMENDATIONS.

The Board would respectfully submit the following recommendations based on the statements set forth in the preceding parts of this report,

FIRST—That the appropriation for the support, maintenance and ordinary repairs of the Sanitarium for the years 1905 and 1906 be fixed at thirty-five cents per capita per diem. This allowance to cover all expenses connected with the institution, including the salaries of its officers, wages of its employees, repairs, etc., and that the Steward be required to submit to your Excellency at the close of each month a certified statement as to the number of patients in the Sanitarium for that month, which number shall be used as a basis for the amount needed for the succeeding month.

SECOND—That the sum of \$10,000.00 be appropriated for the erection of four Tubercular Wards.

Respectfully submitted,

JOEL BRANHAM, President,
THOS. G. LAWSON, Vice-President,
RICHARD JOHNSON, Secretary,
JNO. T. BRANTLEY,
THOS M. SWIFT,
CHAS J. MONTGOMERY, M. D.,

HENRY BANKS.

Report of Superintendent.

**For the Eight Months Beginning May 1st, 1903, and Ending
January 1st, 1904.**

GEORGIA STATE SANITARIUM, January 1st, 1904.

To the Honorable Board of Trustees, Georgia State Sanitarium:

GENTLEMEN:—In conformity with the law and rules of the institution I herewith respectfully submit for your consideration my report, together with those of the Steward, Treasurer, and other officers from May 1st, 1903, to January 1st, 1904. This report covers only eight months to conform to the change in the law. It will give a full and detailed account of the conduct and management of the affairs of the institution in all of its various departments, showing the amount of provisions, bedding, drugs, indeed everything purchased, from whom, price paid, aggregate cost, etc.; also the movement of its population both white and colored.

On May 1st, 1903, there were white patients on hand 1,890, and colored 837. There have been received since, 359 whites, and 211 colored, making a total reception of 570.

There have been discharged, removed, eloped and died, 473, leaving in the institution January 1st, 1904, 2,824 patients, of whom there are 82 whites and 14 colored on furlough, not discharged.

The average number of patients under treatment during the year was 2,770, while the total number receiving treatment was 3,286.

It will be seen that the average number receiving treatment was 74 more than last year. We have 108 more patients on hand than at the close of last year.

The following tables will give in detail the movement of the white and colored population:

STATEMENT—WHITE.

In relation to the number of white patients during the past eight months, or from May 1st, 1903, to January 1st, 1904.

There were patients on hand May 1st, 1903.....	1,890
White Male Lunatics	728
White Male Epileptics.....	113
White Male Idiots.....	40
	— 881
White Female Lunatics.....	915
White Female Epileptics	65
White Female Idiots.....	29
	— 1,009
	— 1,890

There have been received during the year :

White Males.....	194
White Females	165
	— 359

Total number under treatment..... 2,249

Of whom there have been

Discharged restored	159
Discharged improved.....	4
Discharged removed	3
Discharged eloped.....	3
Discharged not insane	2
	— 171

There have died

White Males.....	62
White Females	59
	— 121

— 292

Leaving on hand January 1st, 1904..... 1,957

CLASSIFICATION OF THE WHITES.

White Male Lunatics.....	773
White Male Epileptics.....	116
White Male Idiots	40
	— 929
White Female Lunatics	934
White Female Epileptics	66
White Female Idiots	28
	— 1,028
	— 1,957

Of the white males who have died, there were of marasmus 10, nephritis, acute 2, pulmonary tuberculosis 6, epilepsy 8, enteritis, tubercular 1, diabetes mellitus 1, organic heart disease 4, dysentery, acute 2, enteritis, acute 5, apoplexy, cerebral 2, maniacal ex-

haustion, chronic 5, enteritis, chronic 3, organic brain disease 8, nephritis, chronic 1, maniacal exhaustion, acute 1, senility 2, and paresis 1. Total 62.

Of the white females, septicaemia 1, enteritis, chronic 12, marasmus 4, apoplexy, cerebral 1, gastro-enteritis, acute 1, pulmonary tuberculosis 5, enteritis acute 5, bronchitis, chronic 2, organic heart disease 2, epilepsy 3, bronchitis, acute 2, senility 1, ovarian cyst 1, fracture femur (neck) 1, organic brain disease 3, peritonitis, acute 1, pyaemia 2, pernicious anaemia 1, gastritis, acute 1, neurasthenia 1, ulcerative gastritis 1, enteric ulcer 2, pneumonia, tubercular 1, nephritis, chronic 3, nephritis, acute 1, endo-carditis, acute 1. Total 59.

STATEMENT—COLORED.

In relation to the number of colored patients received during the past eight months, or from May 1st, 1903, to January 1st, 1904.

There were patients on hand May 1st, 1903.....	837
Colored Male Lunatic.....	331

	— 399
Colored Female Lunatics.....	384
Colored Female Epileptics.....	41
Colored Female Idiots	13
	— 438
	— 837

There have been received during the year:

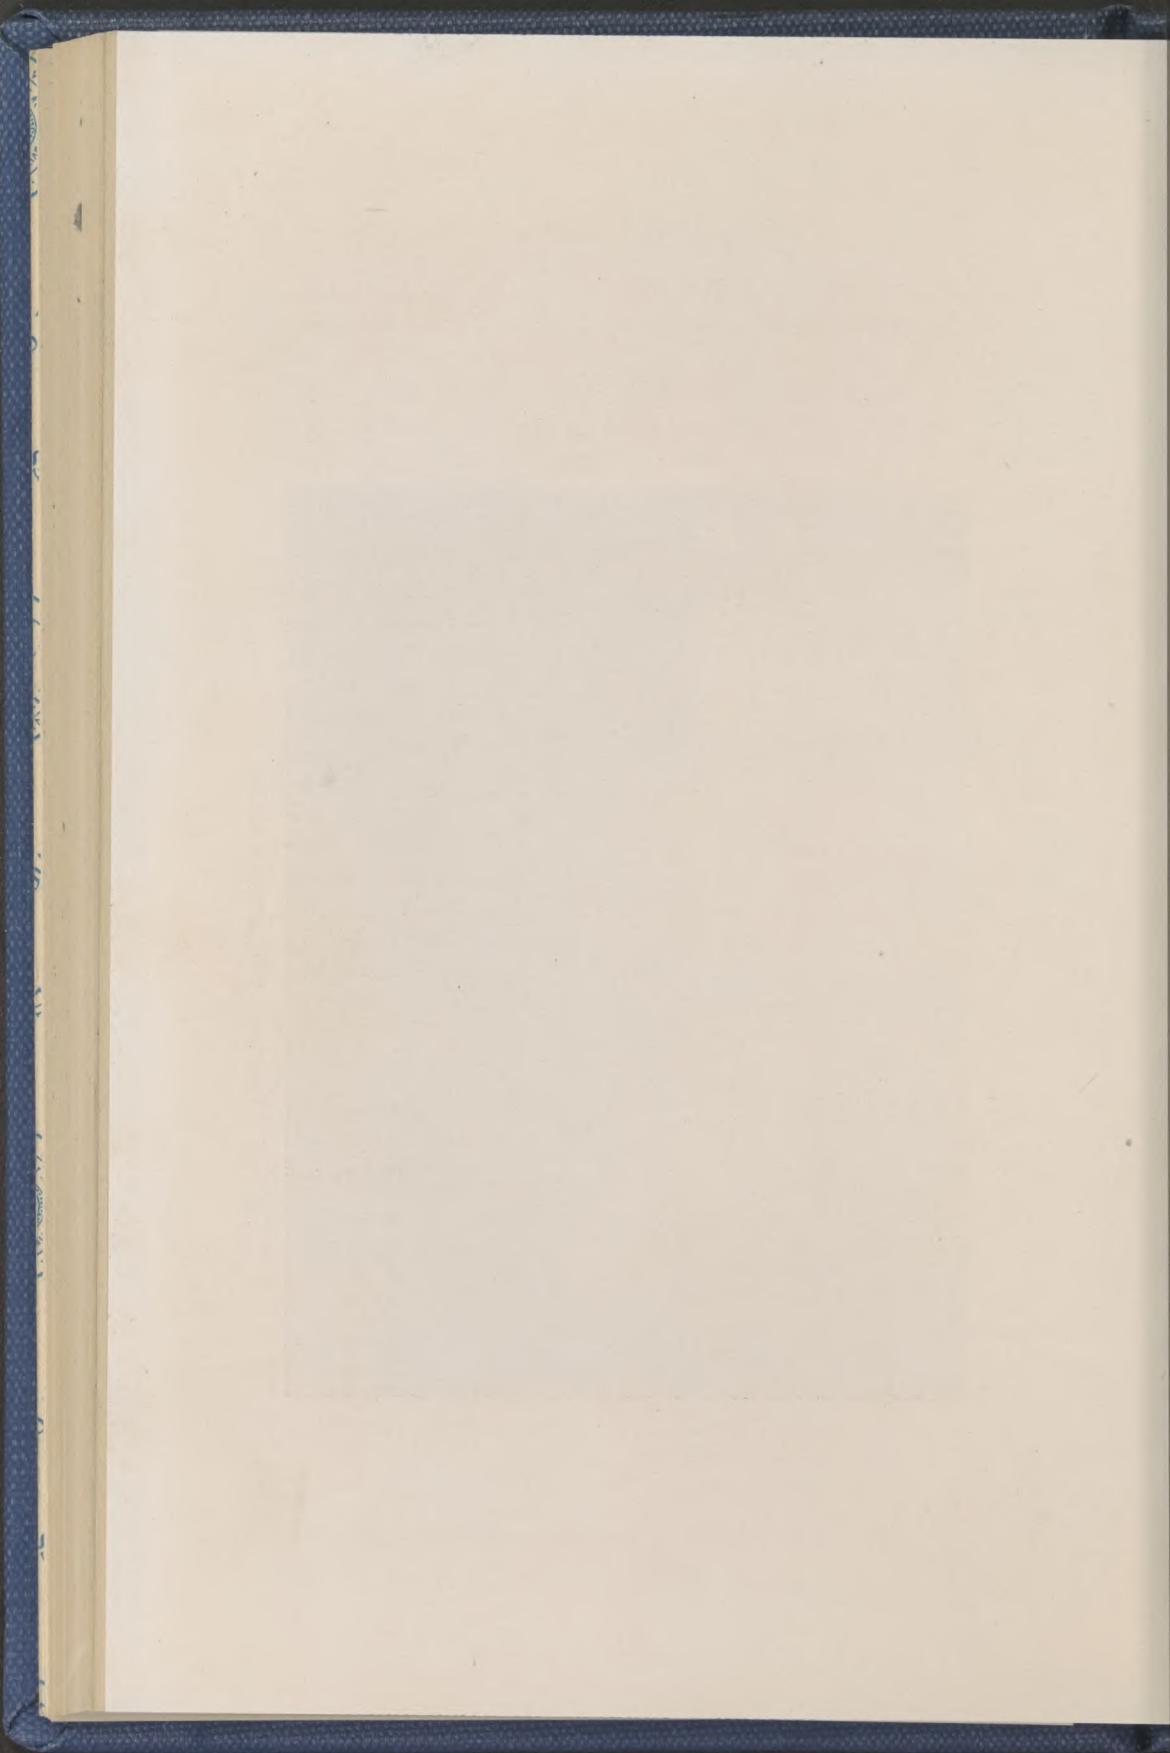

Colored Males.....	105
Colored Females.....	106
	— 211
Total number under treatment.....	1,048
Of whom there have been	
Discharged restored.....	63
Discharged eloped	10
Discharged improved.....	1
Discharged pregnant.....	2
(Brought to the institution in this condition.)	— 76

There have died,

Colorod Males	34
Colored Females	71
	— 105
	— 181
Jan. 1st, 1904. Leaving on hand.....	867

COLONY FOR WHITE MALES.

CLASSIFICATION OF THE COLORED.

Colored Male Lunatics	389
Colored Male Epileptics	48
Colored Male Idiots	11
	— 430
Colored Female Lunatics	407
Colored Female Epileptics	21
Colored Female Idiots	9
	— 437
	— 867

Of the colored males who have died there were of organic heart disease 2, paresis 2, pulmonary tuberculosis 17, epilepsy 1, pott's disease 1, maniacal exhaustion, acute 1, septic peritonitis 1, organic brain disease, syphilitic 1, enteritis, chronic 2, cerebral apoplexy 1, maniacal exhaustion chronic 1, diabetes mellitus 1, general tuberculosis 1, organic brain disease 1, and septicaemia 1. Total 34.

Of the colored females, epilepsy 5, cerebral apoplexy 2, maniacal exhaustion, acute 2, enteritis, chronic 4, organic heart disease 5, marasmus 1, pelvic abscess 1, pulmonary tuberculosis 20, aortic aneurism (rupture) 1, pemphigus 1, ex ophthalmic goitre 1, enteritis, acute 3, dysentery, acute 8, pneumonia, tubercular 2, senility 3, pleurisy, tubercular 1, maniacal exhaustion, chronic 1, carcinoma of liver 1, carcinoma of uterus 1, enteritis, tuberular 2, paresis 1, acute miliary tuberculosis 1, general tuberculosis 1, septicaemia 1, and organic brain disease 1, meningitis 1. Total 71.

Dr. John F. Auer, Superintendent of the Springfield State Hospital of Maryland says that "statistics show a large increase of insanity each year out of proportion to the increase of population, and the cry in all the States is for more room and the enlargement of hospitals for the insane."

According to the United States Census, the number of insane in 1860 was 36,042; in 1870, 27,443; in 1880, 91,997; in 1890, 106,254. In 1860 the percentage of insane to whole population was, native, 1 to 1,569; foreign born, 1 to 720. In 1890, native, 1 to 828; foreign born, 1 to 262.

The figures for Maryland show a startling increase:

	POPULATION	INSANE	PER CENT.
1860	687,049	405	1 to 1,696
1870	780,894	733	1 to 1,065
1880	934,943	1,857	1 to 503
1890	1,042,390	1,785	1 to 584
1900	1,188,044	2,527	1 to 470

The feeble-minded are not included in these figures; if so, they would almost double the percentage.

The report of 1903 of the Commissioners in Lunacy for England and Wales contains the following:

"The aggregate on the 1st of January last, gives the ratio per 10,000 of the total population of 34.14 insane, or one to every 293 persons. This ratio has steadily increased from the year 1859, when reliable statistics of insanity commence, at which date the ratio stood at 18.67 per 10,000, or 1 to 536. The rise has not been quite regular, and in the years 1900 and 1901 the ratio apparently remained stationary, but in the past year it rose from 33.55 to 34.14 per 10,000 or, in round numbers, from 1 insane person in 298 in 1902, to 1 to 293 in 1903."

Dr. A. B. Hays, Superintendent of the Louisiana State Insane Asylum, says that in Louisiana since 1896 insanity has increased six times as rapidly as the general population. The experience in California is stated by Dr. John W. Robertson as follows: "Entering the Union in 1849, its early settlers were necessarily strong, hardy and healthy. In the year 1851, with a population of 130,000, there were but six registered insane, or a ratio of 1 to 21,000. This ratio rapidly rose till in 1860, there was 1 to 1,000, and in 1870, soon after the completion of a connecting railroad, one insane person was tabulated for every 500 of the population. This percentage has gradually risen till at the present time the registered insane number 5,650, or 1 to 260."

And in the New England States, according to the statistics of Mr. F. B. Sanborn, the insane population is increasing at a much greater proportionate rate than the general population.

In New South Wales, according to the last report of the Inspector-General of the Insane, the proportion of cases of "occurring" insanity to the population in 1902 was 1 to 1,484 as contrasted with a proportion of 1 to 1,826, twenty years ago. In the colony there is now one insane person to every 299 of the whole population.

INCREASE OF INSANITY.

The inquiry is frequently made as to whether there is not an alarming increase of insanity beyond the increase of population of both the white and colored races of Georgia, as well as in other States; hence, I shall endeavor to give the best and most reliable information obtainable as to the increase of insanity in the different States and Territories. This information will be principally obtained from the census reports for the past two decades, from 1870 to 1890, and we regret that we cannot give it for 1900, but it will

be several months before the census report on insanity and defectives will be completed and published. It is reasonable to suppose, however, that the white insane of Georgia will be about the same ratio to the population for the past ten years, while with the negroes there is a much stronger hereditary tendency, which makes them more susceptible to insanity than in 1860.

From the census report of 1860 it will be seen that there were only forty-four insane negroes in the State in a population of four hundred and sixty-five thousand six hundred and ninety-eight (465,698), or one insane negro to every 10,584 of population. I do not think there can be any doubt as to the accuracy of the census enumerators for there was no family pride to prevent a correct return, and their owners would have hardly paid taxes on the insane. According to the above statement it will be readily seen that the negroes in Georgia up to 1860 were almost entirely immuned from insanity; indeed, up to 1867 they were the healthiest class mentally and physically in this country, almost free from any insane or tubercular diathesis. The hereditary tendencies and susceptibilities to these maladies now are simply alarming, and from very slight exciting causes these maladies are readily developed. But for the fearful fatality of the insane negro from tuberculosis they would soon be equal to the number of white insane in the State in proportion to their population. This increase will continue with both the white and colored race just so long as the laws of health and heredity are disregarded, and the defective and depraved are allowed to intermarry and perpetuate this class with unstable mental integrity. Standing upon the border-line of these maladies which need only some slight cause to tumble them over. No individual that has an alcoholic, neurotic, depraved or tubercular diathesis, or epileptics, should intermarry with the expectation of having vigorous, healthy children. Heredity is that biological law by which all beings endowed with life tend to repeat themselves in their posterity. This is an inexorable law, and violation of it means disease, depravity, crime and suffering. While insanity is developed from a variety of causes, and they are much more operative now than they were years back, some of us are much more susceptible to it than others from hereditary tendencies. Under these circumstances the unstable brains are totally unable to combat successfully the strains that they are subjected to, and while it is true that any one is liable to brain disease under certain conditions, it is also true that those who are born of vigorous,

healthy parents, free from inherited morbid tendencies, and are obedient to the hygienic laws, are better prepared to resist the attacks of disease.

As to the insane of Georgia, you will see from the census report of 1890 that the increase of insanity is more apparent than real, as the per cent. at that time was only one to every 1,012, so it is not out of proportion to the increase of population. But the increase in the United States, especially in some of the States, is really alarming, and I feel justified in saying that it is only a question of time, if the same conditions continue to exist that now exist, when the per cent. of insane to the population of Georgia will be one to every four or five hundred, and the responsibilities of the care and welfare of this unfortunate class will rest upon those that are blessed with good mental health, and should we not show our appreciation of this the greatest blessing of this life by providing amply in every way possible for their comfort and restoration, for not one of us can tell how soon we or some of our loved ones may be thus afflicted. There are but few families now in Georgia that have not had directly or remotely one or more afflicted with brain disease. A large majority of these unfortunates will have to have State care, but there are many, however, that might and should have county care that are now being sent to this institution. I crave your special attention to the statistics below giving the population, insane, and the proportionate number of insane to the population of each State and Territory in the United States from the census of 1880 and 1890, which show the increase of insanity out of proportion to the population, from which we may get an idea of what may be the ultimate result in Georgia.

CHANGES.

There has been but one change in the medical staff since our last report. Dr. M. L. Perry, the Pathologist, resigned on July 7th, last to take charge as Superintendent of an epileptic colony in Parsons, Kansas. Dr. Perry was a faithful and efficient officer, and we regretted to lose him. Dr. W. C. Pumelly was elected to fill the vacancy caused by the resignation of Dr. Perry, and gives every promise of making a very capable and faithful official.

Dr. Richard Lamar, interne, has been very faithful in the discharge of every duty assigned him, and bids fair to make a most excellent hospital official.

HEALTH.

The general health of the patients for the past eight months has been fairly good considering the number that were brought here old, and in many instances in the last stages of their illness, put to bed on arrival, and remaining there until their death, which was often, but a short while after reception. There were under care and treatment during the past eight months 3,286 patients. The percentage of deaths was .06%, and very few were from curable diseases.

I am glad to report that we have been exempt from all epidemic diseases save influenza on some of the wards. And with quite a large number of suicidal, homicidal and pyromania cases, we can say that there was not a death from suicide or any serious accident of any kind during the period from May 1st, 1903, to Jan. 1st, 1904. This speaks well for the careful attention of the Assistant Physicians and the attendants. The responsibilities and mental strain in the care of the insane increase in proportion to the increase in their number, and the number of homicidal, suicidal and pyromania cases increase generally in the same proportion, and this class always creates great apprehension, and require constant care and observation.

The members of the General Assembly and the public generally cannot appreciate or understand the never ceasing vigilance required of the heads of a large hospital for the insane, and the trying and perplexing ordeals they frequently have to pass through. I regret to report, however, that tuberculosis still prevails with an alarming fatality with the colored insane. I cannot see how we can prevent the spread of it unless we have separate buildings and courts so as to isolate the tubercular cases.

RECOVERIES

The per cent. of recoveries is based on the number received from May 1st, 1903, to Jan. 1st, 1904. We have received during that period 570 patients, of which 264 were chronic and incurable. The percentage of recoveries, however, was .43½, which is very satisfactory indeed.

CONVICT INSANE.

As you know, there was a bill before the last General Assemb'y making separate provisions for the convict insane at the Prison Farm, and I understand it passed the Senate without opposition, and I trust for the sake of the innocent insane it will pass

the House at this session. While we have very few at this time, it would be very unfortunate and hurtful even if we had but one in the Institution. I hope the day is not far distant when we will not be forced to receive the convict insane in this institution.

PATHOLOGICAL LABORATORY.

Dr. Wm. C. Pumpelly took charge of this department in August last. He has been very faithful and attentive to his duties, and his report will give a detailed account of the work done in that department from May 1st, 1903, to Jan. 1st, 1904.

EMPLOYMENT AND AMUSEMENTS.

As usual every effort has been made to give suitable employment to as many of those as can be encouraged to engage in some light employment. The patients are employed in nearly all departments with benefit to themselves. Judicious employment is more beneficial, curative and ameliorating in its influence with many cases than medical treatment, and the same results may be expected from amusements. Dr. Whitaker, First Assistant Physician, has charge of that department, and is untiring in his efforts to make them as pleasant and diverting as possible. I wish we had the means at our command to make them more diversifying. I am satisfied the influence for good would be greater.

IMPROVEMENTS AND REPAIRS.

By reference to the report of the Engineer you will see that the past eight months have been very busy ones indeed. His report will show all work done in that department.

FINANCES.

By reference to the report of our faithful Steward you will see a detailed statement of the management of that department from May 1st, 1903, to Jan. 1st, 1904, and from his report you will see that the per capita cost per diem per patient is .3012. Much credit is due the Prudential Committee and the Steward for this good showing.

ASSISTANT STEWARD.

You will see by reference to the report of the Assistant Steward that the total profits from the farm and gardens, dairies, hogs, etc.,

were satisfactory, especially from the negro colony in the piney woods.

STOREKEEPER.

You will see by reference to the report of the Storekeeper the amount and character of work done in that department since our last report up to Jan. 1st, 1904.

MATRON.

By reference to the report of our good Matron you will see an itemized statement of all the work done in that department during the past eight months, and the amount of fruit canned, preserves, pickles, etc., put up. All the clothing is made and repairing for the entire institution done in this department, principally by patients with the assistance of some attendants.

APOTHECARY.

The report of the Apothecary will show the amount of drugs purchased, the number of prescriptions filled, and the amount of drugs on hand.

DENTIST.

The report of the Dentist will give a detailed account of the class and character of work done in that department for the past eight months.

ACKNOWLEDGEMENTS.

It is with deep gratitude that we acknowledge the continued contributions of papers, periodicals, etc., from year to year.

These donations have an ameliorating and curative influence with many, and makes the life in the hospital away from relatives and friends much more bearable.

By reference to the Librarian's report you will see a list of these donations, and the names of the contributors so far as we have been able to ascertain. There are some sent without the Librarian being able to obtain the name of the sender.

ATTENDANTS AND EMPLOYEES.

It is with much pleasure that I can report the faithful service rendered by the attendants and employees with but few exceptions.

Miss Cross, the Superintendent of the white female nurses, and the Supervisors, have discharged their respective duties in a perfectly satisfactory manner.

RELIGIOUS SERVICES.

The religious services have been conducted regularly on Thursday and Sunday afternoons by our Chaplain, Rev. D. W. Brannen, when the weather would permit, except for a short while when we were quarantined on account of the prevalence of small pox in the vicinity. He has also buried the dead, and visited the sick when advisable.

OFFICERS.

I am under renewed obligations to all the officers for the lively active interest they have taken in the discharge of their respective duties, and for the aid they have given me in the discharge of my duties.

TRUSTEES.

To you, gentlemen of the Poard, allow me to express my deep gratitude for the many acts of kindness and support you have given me in the discharge of my duties, which were frequently very trying and perplexing, and for your wise and judicious counsel in all matters pertaining to the welfare of the Institution.

Trusting in the guidance of a wise and merciful providence,
I am,

Very respectfully,

T. O. POWELL, Superintendent.

Report of Pathologist.

GEORGIA STATE SANITARIUM,
MILLEDGEVILLE, GA., January 1st, 1904.

Dr. T. O. Powell, Superintendent Georgia State Sanitarium.

SIR:—I have the honor to submit herewith a report of the work done in the Pathological Department during my service as Pathologist, dating from August 15th, 1903.

This consists of 22 autopsies, 256 urine examinations, 56 sputum examinations and 31 blood examinations, together with the examination of 3 samples of stomach contents, 3 of faeces, 8 of bacteriological material and 6 samples of pathological tissue.

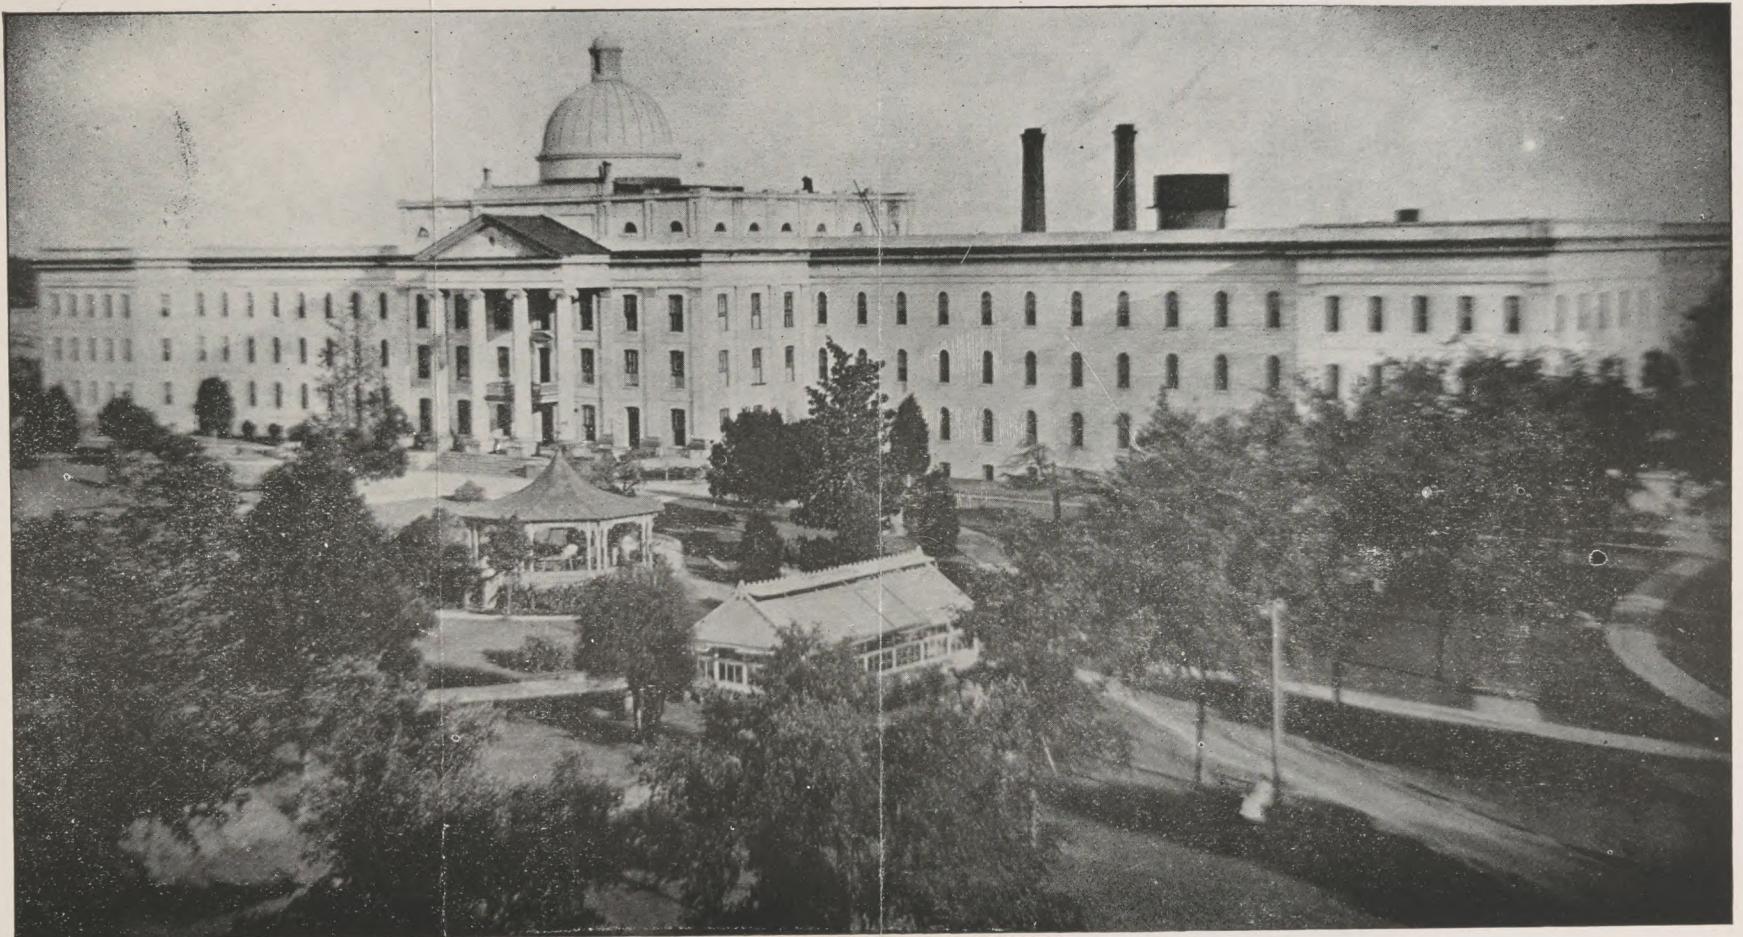

I have attempted in the following tables to present the more important data derived from these examinations.

Acknowledgement is here made of much valuable assistance rendered me in my work by Dr. J. W. Mobley, Dr. N. P. Walker and Dr. E. M. Green.

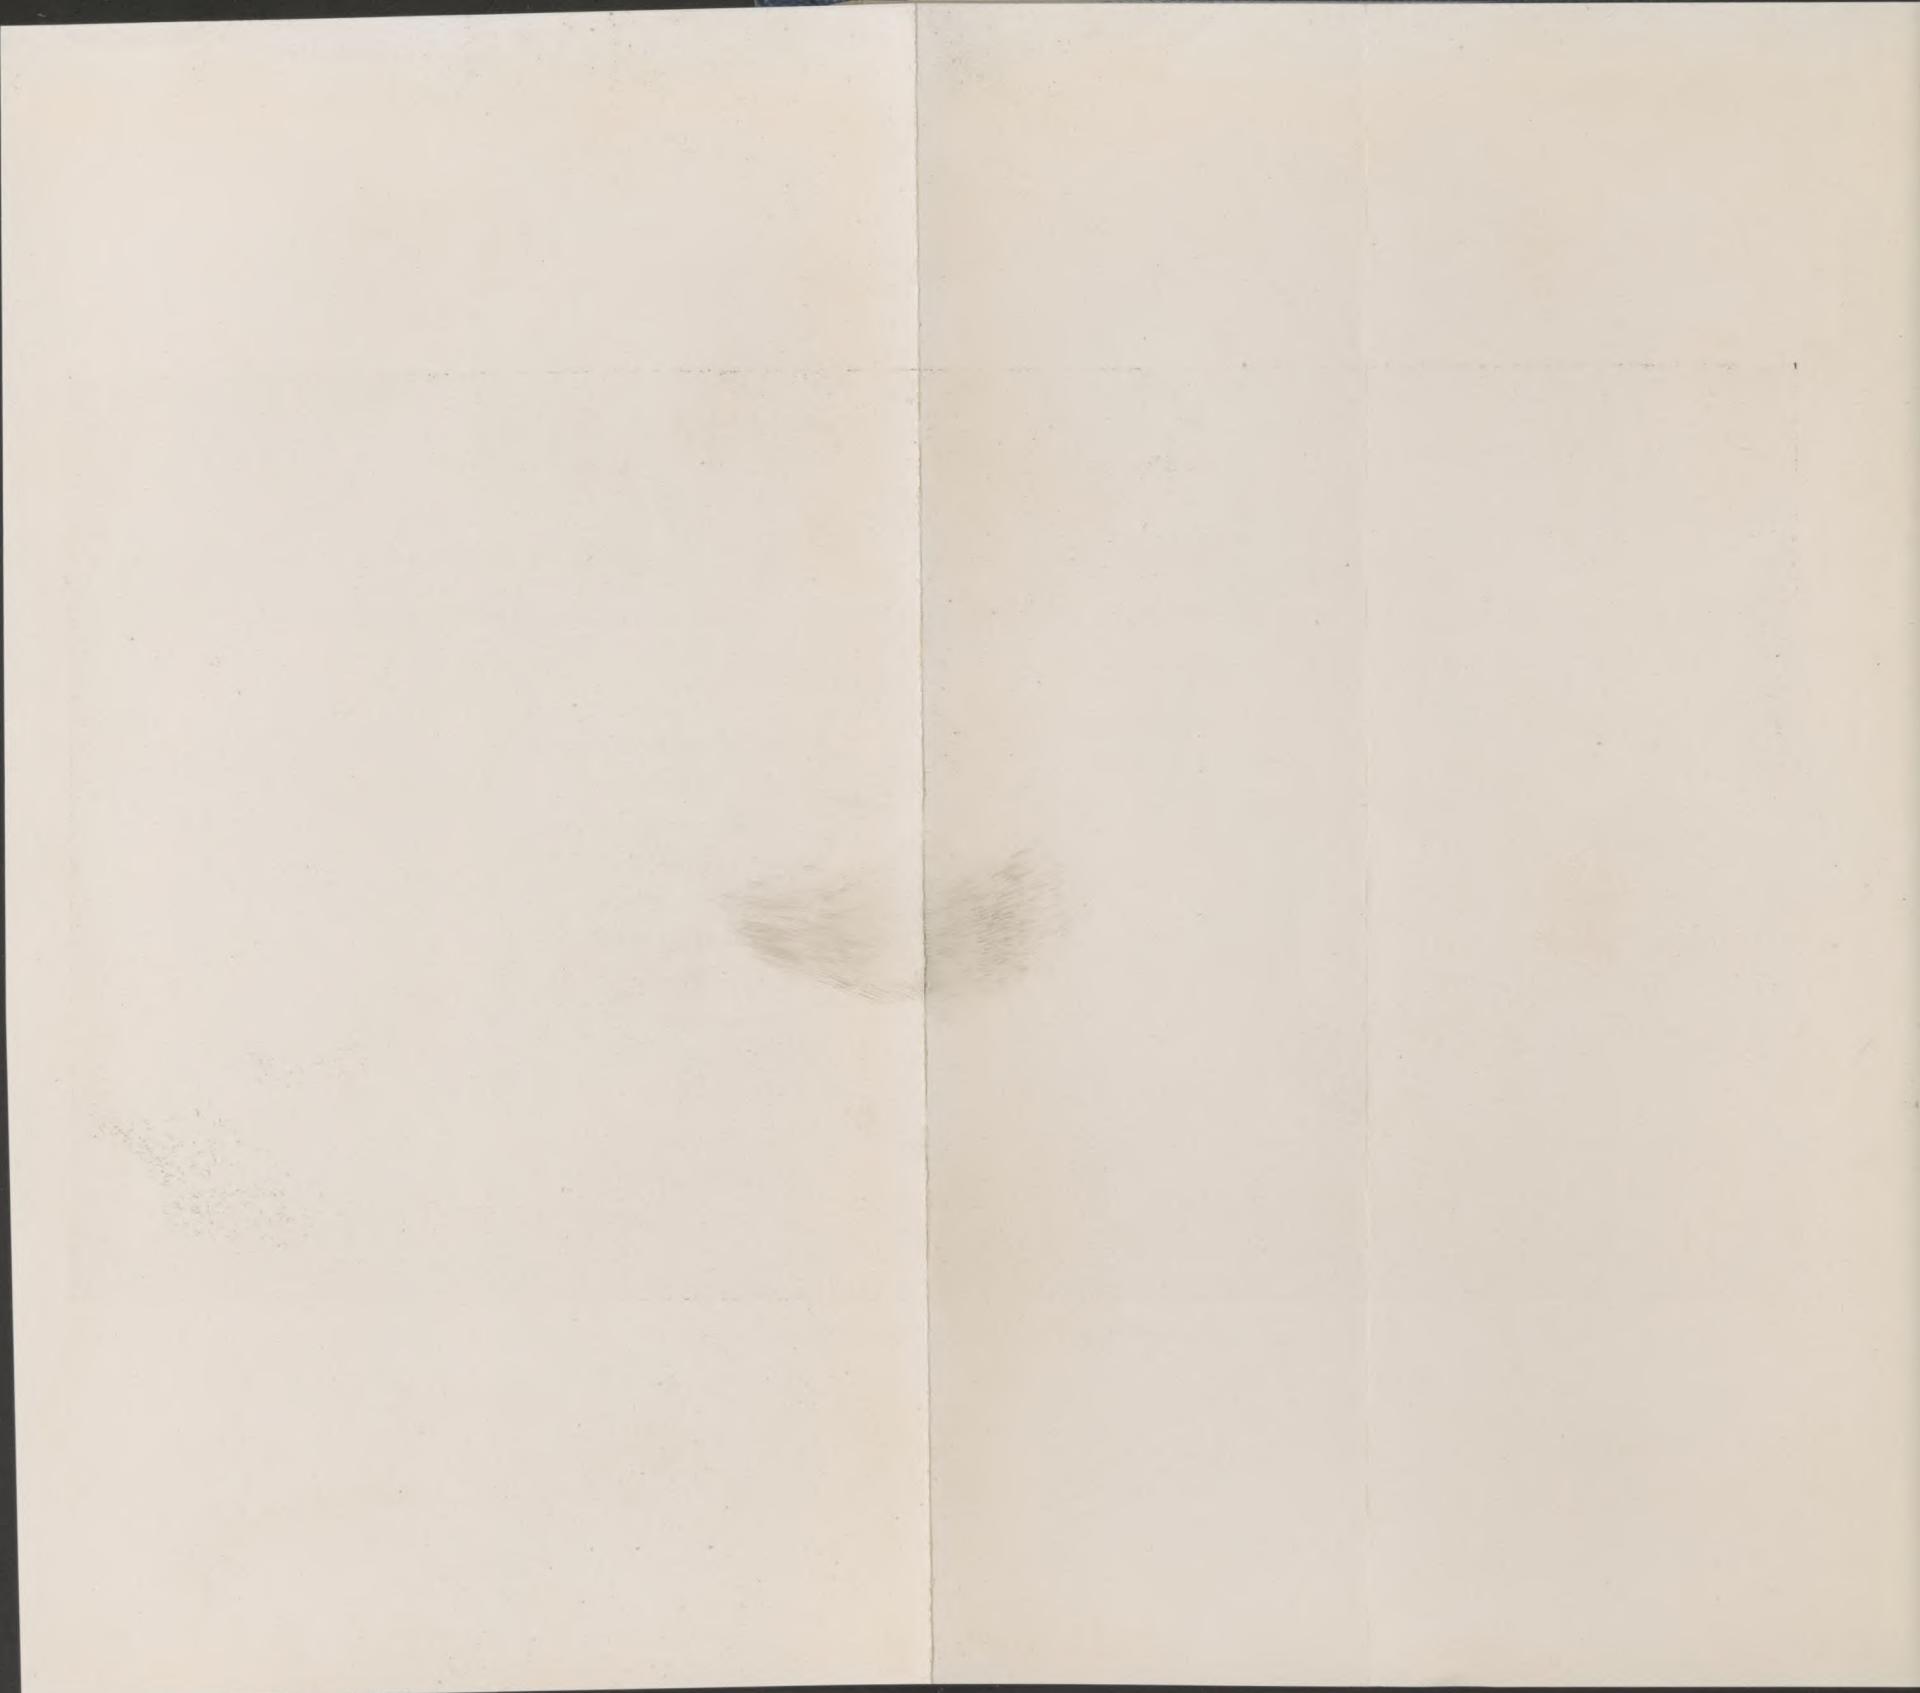

Trusting that the following may meet with your approval, and with many thanks for your support and assistance, I am,

Very respectfully,

WM. C. PUMPELLY, M. D., Pathologist.

CENTER BUILDING GEORGIA STATE SANITARIUM.

SYNOPSIS OF AUTOPSIES.

Case No.					Duration.	Occupation.	Blood, Urine and Sputum Examination.	Ante-Mortem Findings.	Hours after Death.	Post-Mortem Findings.
	Race.	Sex.	Age.	Mental Disease.						
243	C.	M.	32	Mania, recurrent.	6 months.	Farmer.	URINE—Indican, pus, serum, albumen and casts.	Heart hypertrophy with systolic murmur at base, pleurisy with effusion, signs of lung consolidation, oedema of feet and legs.	5	Tuberculosis of lungs, liver, spleen and peritoneum. Mitral incompetency with hypertrophy—parenchymatous nephritis, general anasarca. BRAIN—Oedema, atrophy of convolutions.
244	C.	F.	49	Dementia, terminal.	14 months.		URINE—Negative.	Mitral systolic murmur and oedema.	1	Tuberculosis of lungs, liver and spleen. Aortic incompetency, hypertrophy, fibrinous pericarditis, hydrothorax, fatty infiltration of liver. BRAIN—Negative.
245	C.	F.	50	Mania, recurrent.	6 months.	Housekeeper.	BLOOD—Reds, 1,942, 400; white cel's, 17,560; eosinophiles, .49 per cent. URINE—Negative.	Emaciation, increased liver dullness and icterus.	14	Carcinoma of liver and pancreas, interstitial nephritis, induration of spleen. BRAIN—Thickened dura.
246	C.	F.	43	Mania, chronic.	3 years.	Servant.	URINE—Hyaline casts	Uterine hemorrhage, carcinoma of uterus.	13	Carcinoma of uterus, interstitial nephritis, pulmonary emphysema, induration of spleen, plastic pericarditis. BRAIN—Thickened dura, oedema of pia.
247	C.	F.	35	Mania, chronic.	3 years.			Emaciation, chronic diarrhoea, abdomen prominent, tympanitic and tender with pain over the whole of right side. General anasarca.	1	Tuberculosis of lungs, liver, spleen, peritoneum, purulent appendicitis, general anasarca. BRAIN—Marked oedema. Cortex shows degeneration of nerve cells and increase in perivascular spaces.

SYNOPSIS OF AUTOPSIES—CONTINUED.

Case No.	Race.	Sex.	Age.	Mental Disease.	Duration.	Occupation.	Blood, Urine and Sputum Examination.	Ante-Mortem Findings.	Hours after Death.	Post-Mortem Findings.
248	C.	F.	50	Paresis.	2 years.	Housekeeper.		Bed sores, convulsions, tremulous tongue, faltering speech.	9	Adhesive pericarditis. BRAIN—Marked thickening of dura and pia. Cortex shows extensive sclerosis.
249	C.	M.	27	Mania, chronic.	2 years.	Farmer.		Abdominal pain, imperceptible pulse, vomiting and shock.	13	Purulent peritonitis, intestinal perforation. BRAIN—Not examined.
250	C.	F.	53	Dementia, senile.	4 years.	Cook.		Debility, cough, fever, emaciation.	11	Tuberculosis of lungs, liver, spleen, kidneys, peritoneum. General anasarca, interstitial nephritis. BRAIN—Sub-dural hemorrhage, oedema, atrophy of convolutions, atheroma of vessels at base.
251	W.	F.	56	Melancholia, chronic.	25 years.			Chronic diarrhoea, nausea, fever, icterus.	3	Fatty degeneration of liver. BRAIN—Not examined.
252	C.	F.	65	Paranoia.	16 years.			Palpitation of heart, cough, dyspnoea, oedema of feet and legs.	10	Mitral incompetency, pulmonary tuberculosis, parenchymatous nephritis, fatty infiltration of liver.
253	C.	F.	89	Dementia, senile.	24 years.			Died suddenly.	3	Pulmonary tuberculosis, interstitial nephritis, multiple angioma of the spleen. Pulmonary emphysema, intestinal round worms, (ascaris lumbroides)
254	C.	F.	70	Dementia, senile.	Several years.			Died suddenly.	14	Mitral and aortic incompetency, general arterio-sclerosis, interstitial nephritis. BRAIN—Dural psammosarcoma.

SYNOPSIS OF AUTOPSIES—CONTINUED.

Case No.	Race,	Sex,	Age.	Mental Disease.	Duration.	Occupation.	Blood, Urine and Sputum Examination.	Ante-Mortem Findings.	Hours after Death.	Post-Mortem Findings.
255	W.	F.	49	Mania, chronic.	19 years.	Housewife.		Emaciation, nausea, vomiting, (could retain nothing in stomach.)	2	Multiple gastric ulcer, interstitial nephritis, tubercular scar in left apex. BRAIN—Not examined.
256	C.	F.	48	Mania, chronic	8 years.	Washwoman.		Signs of peritonitis.	11	Pelvic peritonitis, pulmonary tuberculosis, aortic incompetency with hypertrophy and dilatation. BRAIN—Negative.
257	C.	M.							10	Tuberculosis of lungs, liver, spleen and intestines. Fatty infiltration of liver. BRAIN—Thickening of dura, oedema of pia. Cortex shows enlarged perivascular and pericellular spaces.
258	C.	M.	60	Dementia, senile.	18 months.	Farm Hand.	URINE—Indican, sugar, 6.34 per cent.	Incontinence of urine, polyuria, sclerotic arteries, bronzed skin.	2	Diabetes mellitus, diabetic pancreatitis. BRAIN—Thickening of dura, oedema of pia, atrophy of convolutions. Cortex shows tortuosity of vessels, increase in perivascular and pericellular spaces, degeneration of nerve cells and increase of glia.
259	C	F.	73	Dementia, senile.	9 years.	Laundress.		Signs of chronic bronchitis, oedema of feet and legs, systolic murmur, accentuation of pulmonary second sound.	8	Interstitial nephritis, general arterio sclerosis, induration of spleen. Weight of spleen, 25 gms., size 5 5-4.5 c. m. BRAIN—Localized cerebral softening, thickened dura, oedema of pia, atheroma of vessels at base. Cortex increase of nuclei along capillary walls, extensive degeneration of nerve cells.

SYNOPSIS OF AUTOPSIES—CONTINUED.

Case No.	Race.	Sex.	Age.	Mental Disease.	Duration.	Occupation.	Blood, Urine and Sputum Examination.	Ante-Mortem Findings.	Hours after Death.	Post-Mortem Findings.
260	C.	M.		Epilepsy.					13	Pulmonary tuberculosis, fatty infiltration of liver. BRAIN—Marked congestion.
261	C	F.	40	Epilepsy.	6 months.	Servant.		Chill, high temperature, rapid pulse, diaphragmatic breathing, convulsions.	6	Hypostatic congestion of lungs. BRAIN—Purulent cerebro-spinal meningitis
262	C.	F.	50	Melanchol'a, acute.	10 months.	Housewife.	BLOOD—Haemoglobin, 60 per cent.: red cells, 3,902,127; white cells, 3,570, eosinophiles, 2 per cent. URINE—Serum, albumen and casts. SPUTUM—Negative.	Displaced apex, hypertrophy, signs of consolidation of both apices, increased liver dullness.	3	Tuberculosis lungs, pericardium, liver, spleen and kidneys. interstitial nephritis, BRAIN—Thickened dura, oedema of pia, atrophy of convolutions.
263	C.	M.	55	Epilepsy.	18 months.	Farmhand.			3	Pulmonary tuberculosis. BRAIN—Depressed fracture of skull, thickened dura.
264	C.	M.	50	Melancholia.	1 year.	Laborer.	SPUTUM—Negative.		4	Tuberculosis of lungs, pericardium, liver spleen, kidneys and intestines. interstitial nephritis BRAIN—Bone necrosis in left middle fossa of skull. Thickened and adherent dura, oedema of pia, atrophy of convolutions. Cortex-increase of nuclei along capillary walls, perivascular and pericellular spaces enlarged.

NEPHRITIS.

Of the 22 cases examined post-mortem, 11, or 50 per cent. had nephritis, 9 of the cases were of the interstitial variety and 2 were parenchymatous. Nephritis and tuberculosis occurred together in 6 of the cases.

ARTERIAL DISEASE.

This was present in 15 of the 22 cases, 68.1 per cent. In a majority of the cases hyperplasia of connective tissue was marked in all the organs as well as in the vessels. Atheromatous patches in the aorta and in the vessels at the base of the brain were noticed quite frequently, and the cortex revealed sclerosis of the smaller vessels in many instances.

TUBERCULOSIS.

Tuberculosis was found in 12 of the 22 cases, making a percentage of 54.5. It was limited to the lungs in 5 cases and in the remaining 7 the infection was general.

BRAIN.

Of the cases examined there were 9 of oedema of the brain, 1 case of marked congestion, 10 of thickened dura, 1 case of softening and 7 of atrophy of the convolutions.

CORTEX.

Of the 8 specimens examined, marked degeneration of the nerve cells was found in four, sclerosis of the vessels in six, increase in the perivascular spaces in four and increase in the pericellular spaces in four.

There were nine cases of heart incompetency. Two cases of carcinoma. One of Appendicitis.

A few of the cases which have come to autopsy deserve special mention. No. 245, a case of recurrent mania, presents a number of interesting points; the patient was admitted June 13th, 1903, with a negative physical history. Soon after she came it was noticed that she was losing flesh, though she did not complain, and several physical examinations made at that time failed to reveal any signs of disease. On August 1st, she was confined to bed, the loss in flesh continuing until she became extremely emaciated. In the beginning of September jaundice appeared, and it was then

noticed that her liver was much enlarged. About a week before death there was some tenderness over the liver and pain in the epigastrium. She died on September the 27th. A blood examination was made September 9th, it gave a red cell count of 1,942,400, with a leucocytosis of 17,560. The differential count revealed nothing of interest except that there were very few eosinophiles, less than one-half of one per cent. (.49 per cent.)

On post-mortem examination it was found that the liver was very much enlarged, it extended well below the costal margin, and it weighed 2,350 gms. Its consistency was increased and it contained throughout its parenchyma many small tumor masses, a few were to be seen on the surface, especially of the right lobe, they formed flat yellow protuberances, one was quite large, about 5 c. m. in diameter. On microscopical examination these masses were found to be carcinomatous and of the adenoid variety. The gall-bladder was not involved. The pancreas weighed 290 gms. Its consistency was greatly increased and on section it presented the appearance of being a solid mass of cancer tissue. The head of the gland was enlarged out of all proportion to its length, and it had nearly encircled the duodenum and pyloric end of the stomach, though, the intestinal and stomach walls were found to be involved only to a slight extent.

The most interesting fact in connection with the case, is that, while the metastatic growths in the liver were distinctly adeno-carcinoma, the primary growth in the pancreas, a gland organ, was largely of the simplex schirrhous variety. And, in spite of the fact that the pancreatic parenchyma had been very nearly all destroyed, careful urine examinations failed to reveal any trace of sugar.

The marked anaemia, as shown by the blood examination, with the leucocytosis and the very low per cent. of eosinophiles are all worthy of mention. This low percentage of eosinophiles in malignant disease of the liver is mentioned by Musser in his Physical Diagnosis. "He says, in distinguishing malignant liver disease from other liver disease an eosinophilia points to the latter."

The kidneys which were quite sclerotic were found to be in an advanced stage of parenchymatous degeneration.

The accompanying photo-micrographs show fairly well the structure of the growth in the two organs. No. 1 was taken with a two-thirds objective, without eye piece, and shows the structure of the

tumor in the pancreas. No. 2 was taken with the same power and shows the adenoid structure of the liver tumor.

No. 252, a case of senile dementia, showed a most interesting condition of the spleen. The patient was 89 years old and had been in the institution since July 11th, 1884. The clinical history states that the patient was in good health until a few days before death, when she was confined to bed. She had no fever, increased pulse rate or cough and she did not complain of pain. Her appetite was good and she seemed to be in her usual health. She died quite suddenly after eating a hearty breakfast.

On post-mortem examination the spleen appeared swollen, it weighed 80 gms., and on section showed a number of small red areas, which were found to be small angioma, there were many scattered throughout the organ, possibly twenty in all. They averaged in size about 1.5 c. m. in diameter and were quite typical in formation.

The tumor is shown in plate No. 3.

Case No. 254, which I shall only mention, as it was reported in full in the March number of the Atlanta Medical Journal, is one of diabetes mellitus. The degenerated Islands of Langerhans were beautifully shown. The case was very carefully worked up and many interesting points were brought out. The photo-micrograph plate No. 4, shows one of the degenerated Islands.

The post-mortem reports of Dr. Oertel and Dr. Perry have been carefully gone over and a table, which I regret I am unable to submit with this report, is now in preparation. It will contain an abstract from the records of 242 autopsies, and will cover a period of about eight years work in this department. I find that of the 267 patients which have come to autopsy, (this number including my own cases), 121 or about 45 per cent. were tubercular, which shows an alarming prevalence of this disease.

BLOOD EXAMINATIONS.

Thirty-one blood examinations have been made, and in a number of cases the results were of considerable diagnostic value.

SPUTUM EXAMINATIONS.

Fifty-six specimens have been examined for the tubercle bacilli, but in only eleven specimens were the organisms found.

Seven specimens of sputum were examined for the pneumococcus, and it was found to be present in five.

A large number of blood examinations and urine analyses have been made by Dr. Walker for the purpose of ascertaining the changes in the urine and blood preceding and following epileptic convulsions. This work was very carefully done and many interesting points were brought out.

In addition to the above the following miscellaneous work has been recorded; 3 analyses of stomach contents, 3 analyses of faces, and 8 bacteriological examinations, bacillus typhosus being isolated from the stools in one case.

A culture of the bacillus typhosus was secured from the Johns Hopkins University in September and has been kept active by weekly reinoculations, so we are prepared to make Widal's at any time. I am glad to say, however, that we have not had occasion to use the culture this winter.

Report of Steward.

GEORGIA STATE SANITARIUM, January 1st, 1904.

Dr. T. O. Powell, Superintendent:

DEAR SIR: I have the honor to transmit to our Honorable Board of Trustees through you, this my report as Steward, from May 1st, 1903, to January 1st, 1904.

Abstract "A" shows the balance brought forward from last fiscal year, the amount drawn from the State Treasurer for support and maintenance of the Sanitarium, together with a classified statement of the disbursements; also the balance on hand carried forward to next year.

Abstract "B" shows in detail the expenditures on account of Subsistence.

Abstract "C" shows in detail the expenditures on account of Clothing.

Abstract "D" shows in detail the expenditures on account of Fuel and Transportation.

Abstract "E" shows salaries of paid Officers.

Abstract "F" shows wages paid Employees.

Abstract "G" shows in detail the expenditures on account of Incidental Expenses.

Abstract "H" shows in detail the expenditures on account of Medical Supplies.

Abstract "I" shows in detail the expenditures on account of Contingencies.

Abstract "J" shows in detail the expenditures on account of Stationery and Postage.

Abstract "K" shows in detail the expenditures on account of Special Appropriation for erecting new buildings and for other purposes.

Abstract "L" shows in detail the expenditures on account of Special Appropriation for lighting and equipping new building.

Abstract "M" shows in detail the expenditures on account of Special Appropriation for Colony.

Abstract "N" shows the requisitions drawn on the State Treasurer in their regular order for support and maintenance of the Sanitarium.

Abstract "O" shows the average number of patients from 1873 to 1904, together with the per capita cost per diem and per annum.

Abstract "P" shows the cost of maintaining one patient by the year, month, week and day.

Our Store Keeper, Mr. W. H. Hunter, reports stock on hand \$12,790.86.

Our Apothecary, Mr. D. S. Carrington, reports stock on hand \$1,847.75.

Our per capita per diem is 30 $\frac{1}{100}$ cents.

By reference to the report of Mr. Geo. W. Hollinshead, Assistant Steward, you will see results of farm, garden, dairies, hogs, etc.; also a report of stock, wagons, utensils and implements on hand. I have taken advantage of all discounts for cash. All old iron, barrels, sacks, tar, etc., have been disposed of, and amounts realized from sale of same transferred to petty cash account and expended in purchasing country produce. As required by law duplicate vouchers of the expenses, accompanied by the required certificate approved by yourself and audited by the Trustees, have been filed in the Executive Department in Atlanta. I have devoted my entire time to the duties of this office. I feel deeply gratified for the continued confidence of our Board of Trustees as well as that of yourself. Very respectfully,

LUCIUS J. LAMAR, Steward, G. S. S.

ABSTRACT "A."

Statement of L. J. Lamar, Steward, Georgia State Sanitarium, showing the balance brought forward from last fiscal year, and all the money received, together with a classified statement of the disbursements from May 1st, 1903, to January 1st, 1904.

A PEN OF HOGS RAISED AT SANITARIUM.

Report of Assistant Steward.

GEORGIA STATE SANITARIUM,
NEAR MILLEDGEVILLE, GA., January 1st, 1904.

Mr. L. J. Lamar, Steward:

DEAR SIR: I herewith hand you my report as Assistant Steward for the past eight months, beginning May 1st, 1903, and ending Jan. 1st, 1904, of the Dairies, Garden, Farm, Pork and Transportation. Also a statement of Stock, Wagons, etc., on hand January 1st, 1904. We have lost since our last report one old mule, I think it died from old age, and we have also lost nine head of young cattle at new dairy, cause unknown.

Very respectfully, etc.,

GEO. W. HOLLINSHEAD, Assistant Steward.

OLD DAIRY.

Putrescent Pulps removed, tooth treated, cavites and pulp canals filled	54
Cavites filled with Oxphosphate Zinc	244
Cavites filled with Amalgam	341
Cavites filled with Guttapercha.....	2
Cavites filled with gold.....	I4
Crowns made.....	2
Crowns reset	I
Bridges made.....	I
Artificial Dentures made.....	2
Artificial Dentures repaired	I
Hypersensitive teeth from erosion or attrition cauterized with Nitrate of Silver, number of patients	2
Teeth cleaned, number of patients	5
Teeth and roots badly decayed, ulcerative and offensive, extracted.....	I, 100
Number of patients served.....	773
Amount collected from patients for materials used not fur- nished free by the institution.....	\$13 90
Amount collected from patients not connected with the in- stitution for extracting teeth	50
Total.....	\$14 40

The above amount turned over to the Steward. In visiting the wards the mouths of all patients are examined, and such services rendered as are feasible. Respectfully submitted,

J. C. RICHARD, Dentist.

Report of Apothecary.

GEORGIA STATE SANITARIUM, January 1st, 1903.

Dr. T. O. Powell, Superintendent :

DEAR SIR:—The following is my report of the Apothecary Department from May 1st, 1903, to January 1st, 1904.

It is the policy of this department to manufacture all pharmaceuticals, and preparations used by the institution, and we have done so at all times, where it was economy to do so, restricting purchases solely to chemicals and such specialties as are required by the physicians.

STATEMENT.

The following is statement of expenditures, etc., of Apothecary Department from May 1st, 1903, to January 1st, 1904:

Amount of drugs purchased, including druggist's sundries, dental and laboratory supplies, also preparations for fumigation, disinfecting and sanitary purposes.....	\$1,596 93
Alcohol, wines and whiskies.....	706 82
Amount of drugs sold officers and employees	179 47
Amount drugs on hand	1,847 75
Fixtures, etc.....	385 50
Number of prescriptions filled.....	15,743

Respectfully submitted,

D. S. CARRINGTON, Apothecary.

Report of Engineer.

GEORGIA STATE SANITARIUM, January 1st, 1904.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—I have the honor to submit herewith my report of the workings of this department from May 1st, 1903, to January 1st, 1904.

Respectfully submitted,

T. H. DESAUSURE, Engineer.

IMPROVEMENTS.

The cottage mentioned in my last report as being under way has been completed. A bath tub, a water closet and a sink have been put in and connected to the sewer.

BUILDINGS AT COLONY.

The water works, begun during the period covered by the last report, has been completed.

The mule sheds on each side of the barn (each 13 x 50 feet) have been enclosed and floored, thus making additional storage room for corn, etc.

Two sheds, each 13 x 50 feet, have been added to the barn.

A wagon and implement shelter has been built. This structure is 30 feet wide by 110 feet long, with a loft above. The portion of the building used for storing fertilizers, and the loft is floored, the latter with tongue and grooved boards making a tight floor for caring for small grain.

The open ward part of the three frame buildings that were put up during the first part of 1903, have been ceiled and sash put to all of the windows.

There has also been built a dining room and kitchen, a "T" shaped building, having the dining-room 110 feet by 27 feet 6 inches, and the kitchen 50 by 20 feet. Into this latter part there has been put a hot-water apparatus for supplying the dining-room and other buildings with hot water, also a 10 foot wrought iron range has been put in.

An acetyline gas plant has been installed. It has a capacity of fifty lights. Five of the buildings have been piped for gas and the mains run through the grounds. The gas machine is housed in a building set off to itself, and a small house has been built near it for the storage of the calcium carbide.

There has also been put up one outside privy and a smoke house 18 x 24 feet.

The three new buildings and the kitchen have been piped for hot and cold water.

SHOP AND LAUNDRY ENGINE.

A new 45 horse-power engine has been put in at Machine Shop.

TELEPHONE EXTENSION.

One new telephone has been added to the exchange and a line of poles and nine wires have been run, connecting the Whittle and Cabaniss buildings to the Exchange.

SEWERAGE.

Eight hundred and thirty feet of 3-inch, one hundred and twenty feet of 6-inch; and five hundred and twenty feet of 8-inch sewer-pipe has been laid.

PAINTING.

The 15th, 16th, 17th, 18th and 19th female wards and the entire Green building have been painted.

Besides the usual amount of repair work, the following articles have been made in the carpenter shop:

210 Coffins.	6 Sets steps.
55 Boxes for shipping coffins.	10 Rakes.
32 Sets of clothes shelves.	4 Boxes for electric light wires.
75 Tables.	100 Rosettes.
4 Large safes.	59 Hoe handles.
59 Panels of solid fence, 10 ft. high	6 Crates for sewing machines.
24 Shuck mops.	8 Commodes.
1 Wire guard.	1 Gate.
2 Well curbs.	2 Single-trees.
1 Bread box.	2 Wagon bodies.
3 Telephone table boxes.	4 Wagon crates.
2053 Square feet of flooring.	7 Wagon tongues.
6 Hog troughs.	13 Plow beams.
1 Clothes rack.	1 Double-tree.
3 Step ladders.	

In the upholstering shop the following work has been done:

203 Chairs repaired.	28 Tables repaired.
33 New cane seats put to chairs.	33 Woven wire mattresses repaired
5 Lounges repaired.	9 Dresses repaired.
3 Pair of wagon reins made.	1 Safe repaired.

Report of Matron.

GEORGIA STATE SANITARIUM, January 1st, 1904.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—Permit me to submit the enclosed as my report for the eight months ending December 31, 1903. I would add that repairing has been done for the institution and all scraps and remnants have been put to a good use, and have been properly accounted for through the storekeeper's office.

All of which is respectfully submitted,

MRS. J. M. DARNELL, Matron.

Report of Chaplain.

GEORGIA STATE SANITARIUM, January 1st, 1904.

Dr. T. O. Powell, Superintendent:

DEAR SIR:—Permit me to submit this report as Chaplain of the State Sanitarium for eight months ending January 1st, 1904.

Divine services have been held twice a week, on the afternoon of Sundays and Thursdays, except when inclement weather prevented. The services have been well attended, and the patients display an attention and decorum seldom found even among those who attend services under happier conditions.

Mrs. Julia West has been faithful and assiduous in the performance of her duties in leading the service of praise.

All patients have received respectful interment except those claimed by relatives at a distance. Some visits have been made by the chaplain to the sick.

I wish further to express my appreciation to you and others of the staff and employees for various courtesies.

Respectfully submitted,

D. W. BRANNEN, Chaplain.
